REMOTE STORAGE

TRUSTEES' REPORT.

DAYTON, OHIO, November 17, 1905.

To the HON. MYRON T. HERRICK, *Governor of Ohio.*

We have the honor to submit herewith the fifty-first annual report of the condition of the Dayton State Hospital for the fiscal year ending November 15, 1905.

The personnel of the Board remains the same as at the date of the last annual report.

The per capita cost for the year upon the customary basis has been one hundred and twenty-seven dollars and eighty-one cents ($127.81), and including every expense, excepting ordinary repairs and permanent improvements, one hundred and forty-two dollars and seventy cents ($142.70), being about the same per capita cost as last year, notwithstanding the advanced price of food products generally.

The construction in progress during the past year has advanced almost to completion. The capacity of the institution has been increased from eight hundred and fifty to one thousand; but the present quarters are still inadequate, and the proposed men's convalescent cottage, for which an appropriation was denied two years ago, is much needed.

The new power, heating and lighting plant is in operation and giving good service; and, we believe, will meet all increased demands by the growth of the institution for many years.

The general condition of the institution has been maintained at the high standard as heretofore, the officers and employes working together harmoniously; and we desire to commend their good services, and the faithful manner in which they have discharged their duties.

We desire to call attention to the appropriations asked by the Superintendent in his report. We have given the matter our own careful consideration and believe they are necessary to the successful management of the institution.

The management and progress of the institution, condition of patients, disbursements of funds and other details are shown in the reports of the Superintendent and Steward, which are herewith transmitted.

We also desire to express our appreciation of the loyal support you

have given this institution, its trustees and officers during your administration.

Respectfully,

A. N. WILSON, *President,*
C. R. GILMORE, *Vice President,*
T. P. LINN,
G. P. SOHNGEN,
C. C. SHEARER.

SUPERINTENDENT'S REPORT.

To the Board of Trustees of the Dayton State Hospital.

GENTLEMEN: — I have the honor to submit herewith the fifty-first annual report of the Dayton State Hospital for the fiscal year ending November 15, 1905.

By referring to Table No. 1, showing movement of the population, you will see that there were remaining on November 15, 1904, 536 men and 464 women, a total of 1,000 patients. There were admitted during the year 172 men and 109 women, total 281. The entire number under care, therefore, was 708 men and 573 women, total 1,281.

Patients were removed during the year as follows: Recovered: Men 54, women 34, total 88. Improved: Men 12, women 19, total 31. Unimproved: Men 5, women 4, total 9. Died: Men 56, women 40, total 96. Not insane: Men 2. This gives the whole number removed for all causes: Men 129, women 97, total 226. Subtracting this from the total number under care gives the actual number of patients in the institution on the date of this report, viz.: 579 men and 476 women, a total of 1,055.

The percentage of recoveries based on number admitted was for men 31.39, for women 31.19, total 31.31.

The percentage of deaths based on number under care was for men 7.90, for women 6.98, total 7.49.

The average number of patients actually resident during the year was 549 men, 457 women, total 1,006.

The current expense for the year was one hundred and twenty thousand six hundred and ninety-nine dollars and ninety-two cents ($120,699.92); including officers' salaries and trustees' expenses, one hundred and twenty-eight thousand five hundred and seventy-eight dollars and twenty-four cents ($128,578.24).

The per capita cost for current expenses, including officers' salaries and trustees' expenses, based on average number actually resident was one hundred and twenty-seven dollars and eighty-one cents ($127.81).

The per capita cost for the total amount distributed for all purposes, except ordinary repairs and permanent improvements, based on average number actually resident was one hundred and forty-two dollars and seventy cents ($142.70).

Although the institution continues to be over-crowded, we have fortunately passed through another year without any unusual disease or serious accidents.

IMPROVEMENTS AND REPAIRS.

The new *Infirmary Building* for women is just finished and adds one hundred to the capacity of the institution.

The new *Hospital Building* for women with a capacity of fifty patients is almost ready.

One of the older detached wards, known as the *Annex,* is being remodeled and enlarged, and when completed will accommodate fifty men.

The new *Power and Electric Plant,* including apparatus for heating and ventilating, is now in operation and giving high class economical service.

The new *Laundry Building* is under roof, and will be ready for use in three or four months.

The new *Barn* for horses, built this year, will meet every requirement for a long time to come.

The *Minor Improvements* and repairs about the institution have been looked after as usual by our own mechanics, and the general working condition of the plant is better than ever before.

APPROPRIATIONS.

Hospital for Men.— A hospital building for men, similar to the one now being erected for women, is urgently needed. The cost will be about the same, and I am therefore confident that it can be erected, including furnishings complete, for thirty-two thousand dollars ($32,000.00).

Morgue.— As stated in our last annual report, this institution has never had proper facilities for the care of the dead bodies. The small basement room which is used as a morgue is directly under one of the wards and is without ventilation or means of refrigeration. It is a dark, ill smelling, unsanitary place, totally unfit for the purpose.

In order to creditably care for the dead, we should erect a small morgue conveniently located outside the main building, and have included in it an extra room to be used as a chapel. In case of burial in our own cemetery, this chapel would provide a place in which the relatives could hold the religious services so often desired. For the construction of this building, including furnishings complete, five thousand dollars ($5,000.00) should be asked.

Dairy Barn.— Our barns and wagon sheds have for a great many years been located immediately in the rear of the main building. This was never a very desirable arrangement, but since the new cottages have been built in this vicinity, it is especially repugnant to have these unsightly barns with their odors, flies and other disagreeable features right in the center of the ornamental grounds.

For this reason the new horse barn was placed across the road on the farm, and for the same reason the dairy should be moved there also.

The present dairy barn, as you know, is quite old and is becoming too small to accommodate the steadily increasing size of our herd. I would recommend, therefore, that five thousand dollars ($5,000.00) be asked for to erect a modern dairy barn in the more suitable location across the road.

Employes' Building.— When the new laundry building is occupied in the spring it is the intention to remodel the present laundry, which is part of the main building, for the use of employes. Five thousand dollars ($5,000.00) will be required for this purpose, which includes furnishings complete.

Ordinary Repairs.— The next two years will be a period of unusual activity in the way of ordinary repairs. Many of the farm fences will have to be renewed, we must build a vegetable cellar, refuse shed and paint shop, remodel the cold storage building, replace a number of main sewer lines, cement the cellar of main building, construct cement walks to all the new cottages, to say nothing of the multitude of usual minor repairs that can not be foreseen. It is particularly important that we have not less than twenty thousand dollars ($20,000.00) each year in this fund.

Carpets and Furnishings.— The annex must be furnished entire. About three hundred old wooden beds which are unfit for further service must be replaced by iron beds, and some new carpets and various furnishings are needed on the wards. In my judgment five thousand dollars ($5,000.00) will be required for the first year and three thousand dollars ($3,000.00) for the second.

The following tables show the appropriations needed for the next two years:

FOR 1906.

Current expense	$143,000 00
Officers' salaries	9,500 00
Ordinary repairs	20,000 00
Hospital building for men	32,000 00
Dairy barn	5,000 00
Morgue	5,000 00
Employee's building	5,000 00
Carpets and furnishings	5,000 00
	$224,500 00

FOR 1907.

Current expense	$156,000 00
Officers' salaries	9,500 00
Ordinary repairs	20,000 00
Carpets and furnishings	3,000 00
	$188,500 00

FARM AND DAIRY.

The past year was a favorable farming season and as a result all of our crops have been unusually large. A table included in this report shows the yield in detail.

Our herd of dairy cows is in a flourishing condition and continues to be one of the most satisfying and profitable features of the institution.

OCCUPATION AND AMUSEMENT.

All the varied means of occupation and amusement, so frequently referred to in detail in previous reports, have been steadly supplied.

RELIGIOUS SERVICES.

Religious services have been continued throughout the year as heretofore.

ACKNOWLEDGMENTS.

The resident physicians and other officers have discharged their respective duties with fidelity and a desire to promote the welfare of the hospital.

I am happy to bear testimony to the industry and general good conduct of our attendants and employes.

In conclusion, gentlemen of the Board, permit me to thank you for the care and attention you have given to the affairs of the institution and for your uniform kindness and support.

A. F. SHEPHERD,
Superintendent.

November 15th, 1905.

ANNUAL REPORT

OF THE

Supervisor of Public Printing

TO THE

Governor of the State of Ohio

FOR THE

Fiscal Year Ending Nov. 15, 1905.

Vol. III. 5 EX. D.

ANNUAL REPORT.

To His Excellency, MYRON T. HERRICK, *Governor of the State of Ohio:*

SIR: — I have the honor of submitting herewith, in accordance with law, this, the annual report of the Department of State Printing and Binding, for the fiscal year ending November 15, 1905.

GENERAL STATEMENT.

The cost of public printing, including cuts, maps, advertising and electrotyping, during the year was $44,780.49. (For itemized accounts see Auditor of State's Report).

The cost of binding during the year was $44,173.87. (For itemized accounts see Auditor of State's Report).

Amount expended for new machinery at State Bindery during the year was $200.00.

Contingent expenses for the year were $357.36.

The following is a statement of the incidental accounts of the bindery for November 15, 1904, to November 15, 1905:

November 15, 1904, balance on hand	$1,706 21
Receipts for paper shavings, gold sweepings, etc.	739 20
Total receipts	$2,445 41
Disbursements	249 37
Balance on hand	$2,196 04

Under act passed May 14, 1886, the following table will show the paper, cardboard, etc., that was furnished the Deaf and Dumb Institution Printing Office (For Board of Agriculture printing):

Kind of Paper.	*Reams.*	*Sheets.*
Folio Post	1	430
Linen Folio	1	20
Card Board	...	25

PRINTING CONTRACTS.

REPORT OF THE BOARD OF TRUSTEES.

To His Excellency, Myron T. Herrick, *Governor of Ohio.*

Sir: — The Board of Trustees of the Cleveland State Hospital respectfully submit for your consideration the fifty-first annual report, in accordance with the law.

The detailed information of the operation and administration of the hospital is furnished in the reports of Superintendent Dr. A. B. Howard and of the Financial Officer, Mr. Thomas Austin, which are herewith submitted, and to whose efficiency and hearty co-operation the excellent condition of the hospital is largely due. The hospital is fortunate in having a medical staff whose fitness for their work and untiring efforts on behalf of the patients has won our grateful acknowledgment.

While we heartily endorse every recommendation of the Superintendent concerning the needs of the institution, four of them are so great as to make them imperative in our judgment, namely, the bath rooms, porches, farm and cold storage.

The bath rooms are separated from the wards by a considerable distance. This condition during a part of the year and for a class of patients is a menace to their health and impractical where 1,000 people are concerned. The splendid results from the glass porches in the female wards is ample justification for the erection of similar ones for the male wards. The Cleveland State Hospital is the only Ohio institution of its kind without a farm. The reduction of our per capita, the improved condition of a certain class of patients as well as the general efficiency of the institution would result if a farm were added to our equipment. The appropriation of $7,500 for a cold storage plant was found to be inadequate for a building of sufficient capacity. A conservative estimate of the cost of a building and machinery to meet the needs is $10,000. When considering these needs of the institution the physical and mental welfare of the patients can be greatly improved. And the necessary outlay of money must be considered small when the better service to the inmates is considered.

We have given careful attention to the necessary repairs and improvements. The general condition of the buildings and machinery is in excellent order.

Respectfully submitted,

N. P. Nichols, *President,*
J. T. Kelley, *Vice President,*
Geo. L. Fordyce,
W. H. Smiley,
Joseph Dick.

SUPERINTENDENT'S REPORT.

To the Board of Trustees, Cleveland State Hospital.

GENTLEMEN: — I respectfully submit the annual report of the Cleveland State Hospital for the fiscal year ending November 15th, 1905.

On November 15th, 1904, the number of patients was 1,194, 643 of whom were men and 551 women. The number admitted during the year was 490, 275 men and 215 women. Of this number 372 came directly from their homes and 118 were transferred from the city infirmary. Of those who were discharged 162 recovered, 24 improved, 25 unimproved, and 99 died. The number of men recovered was 95, and women 67; improved 10 men and 14 women; unimproved 16 men and 9 women. Of those who died there were 66 men and 33 women.

The percentage of recoveries on the number admitted during the year is 33.

The percentage of deaths on the whole number under treatment is 5.33. Of those who died 27 were in the hospital less than three months, 16 less than six months, 11 less than one year, 14 less than two years, 9 less than five years, and 22 over five years.

The ages of those admitted were as follows:

Between 15 and 20	14
Between 20 and 25	39
Between 25 and 30	46
Between 30 and 35	49
Between 35 and 40	49
Between 40 and 45	46
Between 45 and 50	41
Between 50 and 55	27
Between 55 and 60	17
Between 60 and 65	12
Between 65 and 70	13
Between 70 and 75	77
Between 75 and 85	7
Unknown	123
Total	490

The reported duration of insanity of those admitted was as follows:

Less than one month	132
Between 1 and 3 months	42
Between 3 and 6 months	57
Between 6 and 9 months	23

Between 9 and 12 months	7
Between 12 and 18 months	21
Between 18 and 24 months	3
Between 2 and 3 years	12
Between 3 and 4 years	8
Between 4 and 5 years	7
Between 5 and 6 years	7
Between 6 and 7 years	3
Between 7 and 8 years	1
Between 8 and 10 years	4
Between 10 and 12 years	1
Between 14 and 16 years	2
Between 18 and 20 years	1
More than 20 years	1
Unknown	157
Total	490

The causes of death were as follows:

Acute delirious mania	1
Apoplexy	5
Bright's disease	1
Cerebral hemorrhage	3
Dementia Praecox	2
Delusional insanity	1
Epilepsy	1
Exhaustion, acute maniacal	1
Exhaustion, chronic maniacal	1
Exhaustion, chronic dementia	2
Exhaustion, acute melancholia	6
Exhaustion, shock	1
Hodkin's disease	1
Heart disease	10
Organic lesion of brain	2
Paresis	28
Phthisis pulmonalis	10
Pre-senile dementia	1
Sarcoma	1
Senile dementia	18
Terminal dementia	3

The average cost per capita, per annum, based on the number of inmates actually in the institution and the net current expenses $130.80.

The average cost per capita, per annum, based on the number of inmates actually in the institution and all appropriations excepting those made for repairs and improvements and permanent improvements $140.73.

On September 30th the new infirmary building, with a capacity of 180 beds, was opened, thus making room in the wards for patients transferred from the Cleveland City Infirmary; there being received 119. With the transfer of 116 Ashtabula county patients to Massillon it will relieve the crowded condition of the past to some extent. With the ex-

ception of Geauga and Lake counties, amounting to 78 patients, the institution will be populated by patients from Cuyahoga county. This new building affords an opportunity of placing the filthy class of patients in dormitories instead of having two or three in single rooms as formerly.

A recreation hall 34 x 48 has been completed and furnished for the use of female patients during the day and employees during the evenings. Cards, games, music, a library, etc., will be at the disposal of all. While below are two bowling alleys, billiard, pool and card tables. Much enjoyment has been found in this building, not only by the patients but the employes have dancing parties every two weeks and find it a place for recreation whenever free from duty. It is needless to say it is fully appreciated by all.

A new engine has been installed, the contract having been awarded the Skinner Engine Company, of Erie, Pa., at a cost of $1,940.00. The contract for the dynamo and switchboard was awarded the Akron Electric Company for the sum of $2,700.00.

The flues of seven boilers have been renewed so that our boilers are in excellent condition.

Six thousand six hundred feet of inch pipe has been laid. Also 790 feet of cement walk 5 feet wide and 1,740 feet 4 feet wide, and 1,200 feet of cement floor in the kitchen of the male cottage. Also 5,131 feet of tile. All of the work has been done by the patients, besides the usual painting of the wards, grading about the grounds, etc.

The various holidays have been observed in the usual custom together with the weekly dances and frequent entertainments. We have been very fortunate in having an excellent orchestra of ten pieces, and they have entertained the patients and their friends on the lawn three afternoons each week when the weather permitted. Fully 90 per cent. of the patients were able to enjoy these concerts. Wednesday and Saturday afternoons were devoted to base ball.

The health of the population has been exceptionally good and I attribute it largely to the fact that so much time was spent in the open air. A daily average of 67½ per cent. of the male and 87.25 per cent. of the female population have been out of doors attended, while 21⅓ per cent. of the male and 5.41 per cent. female population have been out unattended; 51.75 per cent. of the female and 59 per cent. of the male population have been engaged in some kind of employment.

I feel under obligations to the consultants of the medical staff for the services they have rendered during the year. Dr. Rosensteel has held dental clinic each week and has treated 471 patients. I am fully convinced that it would prove a great benefit to the patients as well as the medical staff if a clinic in the various departments of the science of medicine could be held weekly.

Our Acute Hospital which opened a year ago, with a capacity of 48 beds, 12 patients in each ward, has proven a success in many ways as

the patients are not compelled to associate with the chronic classes, and greater personal attention can be given both by the physicians and nurses than in wards inhabited by fifty or sixty people. Acute patients are placed in this building and kept under observation until it is ascertained that they will not recover, or until they become a detriment to the welfare of the more hopeful ones, when they are returned to the wards under proper classification. Baths, massage, and special diet is administered, and one hour directly after dinner is devoted to rest. The ratio of attendants to patients in this building is 1 to 7, and while more expense is required to maintain a building of this kind, the results have been very gratifying. Of the 171 patients admitted to this hospital during the year we have had 91 recoveries. Thirty-six remaining and the balance returned to the wards of the institution.

A Hydrotherapeutic equipment has just been installed in the basement of this building and it is hoped th at good results may be attained.

On outdoor gymnasium is contemplated next summer and it is hoped that with a competent instructor much benefit will be derived by the patients.

The financial statement shows an expenditure of $169,786.18. As there were not sufficient appropriations to complete the furnishings of the infirmary building, $1,000 was taken from the current expense fund for that purpose. Five hundred dollars was also taken from this fund to replace clothing destroyed by fire in the wardrobe of ward 8, the cause of the fire being unknown.

The lectures in the training school have been carried on as heretofore. Members of the medical staff have been engaged in giving instruction. Following are the names of graduates of last year:

Covel Lee Fuller,	Florence L. Dredge,
Elizabeth M. Cottle,	Charles H. Lerch,
Elizabeth M. Hostetler,	Lisa H. Murray,
Chas. P. Walsh,	Emma L. Hartell,
Edith M. Bosley,	Cyrus S. Miller,
Charles R. Conway,	Mae Hurley,
Linnie Bowman,	Geo. H. Smith,
Walter H. Groff,	M. Zora Starr,
Frank F. Foy,	Mary G. Vogt,
Elizabeth Babcock,	Anna O. Gallagher.

The exercises were held on April 18th, 1905, and the address was delivered by Rev. Jesse Hill. Music was furnished by the Ionic Quartette and harp selections by Prof. Miles. Diplomas were presented by Mr. N. P. Nichols, President of the Board of Trustees.

Religious services have been held as usual Sunday afternoons except in the summer months, or in inclement weather. Clergymen from

the Presbyterian, Methodist and Disciple denominations have officiated. Mass has been said every second Sunday by Rev. J. T. Carroll.

I beg to call your attention to the fact that the Cleveland State Hospital is the only institution of its kind in the state that has no farm land. The 98 acres are almost wholly utilized by buildings and lawns. Practically all farm and garden produce, milk, etc., has to be purchased. Consequently a farm in connection with the institution would not only prove an economy in removing the disadvantages we are now under, as compared with other institutions, by decreasing the per capita cost, but would afford occupation for many chronic patients who are necessarily idle and discontented. Land can be purchased within a few miles of the institution accessible by the Akron, Bedford & Cleveland Electric, and with a switch at the farm and at the hospital arrangements could be made with the railway company for transportation of patients and produce, although I would be in favor of establishing a colony at the farm. Land can be purchased at a reasonable price. I earnestly recommend that this work be taken under consideration and a sufficient amount be appropriated for this purpose.

The legislature of 1903 appropriated $7,500 for a new cold storage plant and ice machinery. After securing plans and specifications bids were advertised for but all were in excess of the appropriation. So that we have been placed at a great inconvenience, much of the time being without ice. It is very important that the legislature appropriate $10,000 for a cold storage plant.

Notwithstanding the many years this institution has been established it has never possessed a laboratory. It was recommended last year but owing to a scarcity of funds in the treasury it was not granted.

In an institution of this size it is not only fair to the medical staff connected with it, but to the medical profession at large that a thoroughly equipped laboratory be established and a competent pathologist engaged. I, therefore, recommend that a thousand dollars be appropriated for the equipment of such a laboratory.

With the constantly increasing population it is quite necessary that we have additional room in our laundry department. This can be obtained by converting the present carpenter and engineer shops now adjoining the laundry for such purposes and erecting an industrial building for the carpenter, engineer, tinner, upholsterer, etc., with rooms for some of the employes on the upper floor. I would respectfully recommend that $10,000 be appropriated for such a building.

With the additional buildings now in use it is found that the capacity of the present stand pipe is insufficient to supply all the water required, notwithstanding the pumps are in use night and day. Consequently it is necessary that a new water tower be erected at the south end of the grounds. At a cost of $8,500.00.

One thousand dollars is required for a new pump, the present one having been in use for 30 years and is totally unfit for further service.

Two years ago $2,000 was appropriated for balconies to be attached to the infirm and hospital wards on the female side. These porches are 30 x 36, enclosed with glass windows and have proven not only a great source of comfort to the patients in inclement weather, but have afforded such patients as were unable to get out to walk an opportunity to practically live out of doors in summer, and have doubled the capacity of the wards as they are heated and lighted for winter use. I would recommend that $2,000 be appropriated for a like construction on the male wards 4 and 5.

Under the present arrangement fully 1,000 patients are compelled to walk quite a distance in order to get their baths. This system is not only inconvenient but impracticaal and dangerous to the health of the patient; especially in winter weather. I would suggest that the present system be abandoned. The bath room to be converted into a gymnasium and a bath room be attached to the rear of the building for males and one for females. At a total cost of $4,000.

During the year 20 voluntaries have been received over last year, making a total of 47. So popular has this new law become that we are seldom without ten or twelve patients instead of five as the law allows.

It is a noticeable fact that quite a per cent. of the patients admitted to this institution are alcoholics and after a few days' sojourn in the hospital or as soon as the alcohol is eliminated from the system they become perfectly normal. It is not only an expense to the county to have such patients committed to the institution, but it deprives the family of their support while the patient is confined. Many such cases do not rightfully belong here and the city should provide for them either in a detention hospital or a suitable ward in the city hospital until it is known that they are insane enough to be committed to the State Hospital.

On August 14th an unfortunate accident occurred in ward 6, the violent ward. A patient named Michael Gubek made a violent attack upon another patient while in the toilet room. The attendants in the hall heard the noise and separated the patients at once. Although there were no bruises found upon the body of Fred. Bomer, about two hours after the trouble he died. The coroner rendered a verdict of death from internal hemorrhage. While we have had many patients manifesting suicidal tendencies, I am happy to say through the close watchfulness of the attendants and nurses there are no cases of suicide to report.

In behalf of the patients who have enjoyed the papers, magazines, etc., so generously donated by Mrs. S. M. Perkins and Mrs. A. E. Hyre and many others I desire to express my hearty appreciation.

I am not unmindful of the responsibility that rests upon each attendant and nurse in caring for their patients and with few exceptions

I am happy to say that the fulfillment of their duties has been faithfully executed, and with an interest in the welfare and recovery of those committed to their charge. I, therefore, desire to express my gratitude to the officers and employes of the institution for their faithful and intelligent co-operation.

To our financial officer, Mr. Thomas Austin, who is ever careful in the disbursement of funds, and to you, gentlemen of the Board of Trustees, I regard it not only a pleasure but a privilege to acknowledge my appreciation for the universal kindness extended Mrs. Howard and myself, and for the untiring interest you have each taken in the welfare of the patients and the management of the institution.

Respectfully submitted,

ADAMS B. HOWARD.

FACTORY AND BUILDING INSPECTION DISTRICTS.

FIRST DISTRICT.

FRANK C. BASE, *Inspector*.....26 Elmside, Cleveland.

Ashtabula, Cuyahoga, Geauga and Lake Counties.

SECOND DISTRICT.

JOHN F. WARD, *Inspector*.....1028 Star St., Youngstown.

Ashland, Mahoning, Medina, Portage, Summit, Trumbull and Wayne Counties.

THIRD DISTRICT.

JOHN W. BATH, *Inspector*.....351 Third St., Elyria.

Crawford, Erie, Huron, Lorain, Richland, Sandusky and Seneca Counties.

FOURTH DISTRICT.

E. S. BRYANT, *Inspector*.....Bloomdale.

Defiance, Fulton, Henry, Lucas, Ottawa, Paulding, Putnam, Williams and Wood Counties.

FIFTH DISTRICT.

JOHN W. BLY, *Inspector*.....528 E. Lincoln St., Findlay.

Allen, Auglaize, Hancock, Hardin, Logan, Mercer, Shelby, Van Wert and Wyandot Counties.

SIXTH DISTRICT.

L. W. RALSTON, *Inspector*.....Mechanicstown.

Carroll, Columbiana, Coshocton, Harrison, Holmes, Jefferson, Stark and Tuscarawas Counties.

SEVENTH DISTRICT.

C. W. HIGHFIELD, *Inspector*.....224 W. Main St., Zanesville.

Fairfield, Hocking, Knox, Licking, Morrow, Muskingum, Perry and Vinton Counties.

EIGHTH DISTRICT.

RICHARD LLOYD, *Inspector*.....437 Gilbert St., Columbus.

Delaware, Fayette, Franklin, Madison, Marion, Pickaway and Union Counties.

NINTH DISTRICT.

C. B. BAKER, *Inspector*.....409 W. Water St., Piqua.

Butler, Champaign, Clarke, Darke, Greene, Miami, Montgomery, Preble and Warren Counties.

TENTH DISTRICT.

ANDREW SPAETH, *Inspector*.....3 Bavaria Bldg., Cincinnati.

Hamilton County.

ELEVENTH DISTRICT.

JOHN H. GILLEN, *Inspector*.....R. F. D. No. 1, Portsmouth.

Adams, Brown, Clermont, Clinton, Gallia, Highland, Jackson, Lawrence, Pike, Ross and Scioto Counties.

TWELFTH DISTRICT.

O. D. BELL *Inspector*.....423 N. Sixth St., Cambridge.

Athens, Belmont, Guernsey, Meigs, Monroe, Morgan, Noble and Washington Counties.

THIRTEENTH DISTRICT.

EDWARD GRIFFIN, *Inspector*.....12 Bellevue St., Cleveland.

Ashtabula, Cuyahoga, Geauga and Lake Counties.

HIGH EXPLOSIVE.

JOHN W. BATH, *Inspector*.....351 Third St., Elyria.

Territory the entire State.

BAKESHOP INSPECTION DISTRICTS.

NORTHERN BAKESHOP DISTRICT.

THEODORE WAGNER, *Inspector*.....35 Berwick St., Cleveland

Allen, Ashtabula, Ashland, Auglaize, Carroll, Columbiana, Crawford, Cuyahoga, Defiance, Erie, Fulton, Geauga, Hancock, Hardin, Harrison, Henry, Holmes, Huron, Jefferson, Knox, Lake, Logan, Lorain, Lucas, Mahoning, Marion, Medina, Mercer, Morrow, Ottawa, Paulding, Portage, Putnam, Richland, Sandusky, Seneca, Shelby, Stark, Summit, Trumbull, Tuscarawas, Van Wert, Williams, Wood, Wyandot and Wayne Counties.

SOUTHERN BAKESHOP DISTRICT.

WILLIAM WOEHRLIN, *Inspector*.....3 Bavaria Bldg., Cincinnati.

Adams, Athens, Belmont, Brown, Butler, Champaign, Clarke, Clinton, Clermont, Darke, Delaware, Fairfield, Fayette, Franklin, Gallia, Greene, Guernsey, Hamilton, Highland, Hocking, Jackson, Lawrence, Licking, Madison, Meigs, Miami, Monroe, Montgomery, Morgan, Muskingum, Noble, Perry, Pickaway, Pike, Preble, Ross, Scioto, Union, Vinton, Warren and Washington Counties.

STATE OF OHIO,

J. H. MORGAN, CHIEF INSPECTOR,

DEPARTMENT OF INSPECTION OF WORKSHOPS AND FACTORIES,

COLUMBUS, OHIO, December 4, 1905.

To His Excellency, MYRON T. HERRICK, *Governor of Ohio:*

SIR: — The Twenty-second Annual Report of the Department of Inspection of Workshops, Factories and Public Buildings, containing a detailed statement of the work performed during the fiscal year ending November 15, 1905, is herewith submitted.

INSPECTIONS.

The total number of inspections made during the year is seven thousand, four hundred and seven. These figures merely represent the number of inspection reports placed on file in this office during the year just ended. They do not, however, represent the full quota of work performed by the district inspectors. In nearly every instance where an order has been issued, and there were two thousand, three hundred and four issued, a second visit, and in many cases a third and fourth one has been necessary in looking after the work, and securing compliance with the requirements of the statutes.

PUBLIC BUILDINGS.

During the year as much time as could be spared from the regular factory work has been devoted to public building inspection, which includes schoolhouses, halls, hospitals, theaters, etc.

This class of work is second to none in importance within the jurisdiction of the department. It is no mean task in many cases to provide ample means of egress for those who may be assembled in such buildings. We have given careful consideration to each and every case, always bearing in mind the purpose for which the department was organized, namely, the protection of life and limb.

Apropos of public buildings, permit me to call your attention to those buildings owned by the state in which the wards of the state are housed. The department has made inspections of two such institutions and issued orders, but in neither case was a compliance secured, there being no appropriation made by the legislature for this class of work. The Toledo Hospital for the Insane was inspected by the department

on January 7 and 8, 1903. This institution, as you are aware, is built on the cottage plan. We found, with one exception, that each building has but one stairway and means of egress. The orders issued call for additional means of egress. An inspection of the Girls' Industrial Home at Delaware was made June 27, 1905, and additional means of egress was ordered for this institution, which should be provided at the earliest opportunity. The attention of the chief inspector was called to this case by members of the committee of the Seventy-fifth General Assembly when they returned from a visit to this institution.

I have no doubt there are other buildings, the property of the state, in a similar condition. We have refrained from visiting any others because we could not see our way clear to secure compliances, were it necessary to issue orders, owing to the lack of funds for such work. The department is ready and willing to co-operate with the legislature to bring about a much-needed reform in these matters. I am quite sure if that body fully comprehended the importance and necessity of such work, the appropriation would be provided. Surely it is not regarded as the duty of the superintendents of these institutions to visit and inspect all parts of these buildings in the hour of midnight, as is often done at the Toledo Hospital, where the anxiety for the lives of the patients under his care is such that Dr. Tobey very frequently arises at midnight to make a personal inspection of each building. Such a condition of affairs ought not to be permitted to continue.

HIGH EXPLOSIVES.

I wish to renew the recommendation made in former reports that provision be made for the appointment of an inspector who shall give his whole time to the work of inspecting the manufacture, storage and handling of high explosives. At present this work is done by one of the district inspectors who has a large factory district to look after. The development of the gas and oil territories, as well as the mining industry, has caused a very large increase in the number of high explosive magazines located in the state. And while it is a very essential product in the development of the above named industries, it is very important that the storage magazines and factories should be arranged and located so as to cause the least possible amount of damage, both to life and property, should they explode. With this end in view, the last session of legislature passed a law making it the duty of the high explosive inspector to examine every proposed site for a factory or magazine. This has also added greatly to the duties of the inspector.

In view of the importance of the work and the risk incurred, the salary of the inspector should be commensurate with the duties performed and the responsibilities assumed.

BAKESHOPS.

I would recommend the amendment of the bakeshop law so that after a specified date cellars and basements could not be occupied or used as bakeshops. A reasonable time should be given in which present occupants of such bakeshops could comply with the law without working a hardship to them.

It is almost impossible to have clean and wholesome surroundings in places of this character, and where the health of the public is so much involved as in the product of a bakery, it is essential that the sanitary conditions should be the very best.

CHILD LABOR.

The subject of child labor is one of the greatest issues forcing itself upon the American people to-day, and one which we cannot neglect without endangering the very foundation of our government. The child labor laws of this state are among the very best, and I believe are as rigidly enforced as those of any state in the Union.

To secure the best results, however, the child labor and compulsory education laws should co-operate; the one keeping the children out of the workshops, factories and mercantile establishments, and the other placing them in school. These laws should be made plain and simple.

As I have indicated in former reports, our law is defective in that the compulsory education law does not harmonize with the requirements of the minor labor law relative to the age and schooling certificates. Section 4022-2 of the Revised Statutes should, therefore, be so amended that age and schooling certificates would be issued throughout the entire year, regardless of whether schools are in session or not, thus securing a more uniform method of working out this great problem.

The law should be further amended to provide some way by which the residents of other states who come to Ohio to work would come within the same provisions as our own citizens. In other words, some authority should be given for the issuing of certificates to those who reside beyond the borders of our state, but who labor in the factories in Ohio along the border line. The present law provides that the superintendent of the public schools shall issue age and schooling certificates to those who reside within his school district and who qualify under the requirements of the law. The superintendent is not required by the law to issue certificates to those who reside beyond his jurisdiction, and yet these minors come within his school jurisdiction to labor in the factories.

We have, under the jurisdiction of the department, a law in Section 6986-1, providing that minors under the age of sixteen years shall not be engaged in employment where his life or limb is endangered,

his health likely to be injured, or his morals depraved. This law is defective insofar as it does not specify what occupations come within this classification, it being left to the judgment of the inspector to decide. Experience has shown that the inspector and employer are freuently at variance as to what occupations should be classed as dangerous to life, limb, and health, or inimical to good morals.

To remedy this defect Senate Bill No. 60, designating the various occupations at which minors under the age of sixteen could not be employed, was introduced in the last General Assembly and passed the Senate, but was lost through failure of passage in the House. This bill would be a great help to the department in protecting the interests of minors employed throughout the state in various capacities, and should be made a law by the next General Assembly.

The department has never been given by the law-makers of Ohio any discretionary power in enforcing the child labor laws to the end that a child, on one plea or another, could enter the factories or mercantile establishments at a lower age than that specified in the law. And, in my opinion, it never should be granted. On the contrary, if any such power were to be given, it should be to the advantage of the child, and consequently to the state. This might be done by giving the department having supervision of this work authority to inquire into the home conditions, and if found favorable, refuse the child a certificate permitting him to work, and instead, require him to attend school even though he has secured an elementary education.

During the year a great deal of attention has been given by the department to child labor matters. During the early part of the year we tried a new method of carrying on this work, which we called the "Squad System." By it the district inspectors were massed in one locality, and worked in pairs, being better able in this way to thoroughly investigate the conditions. By working in this manner we found considerable cause for complaints that have come to the department in past years was removed, owing to the fact that all mercantile establishments in each locality, or factories of a particular class, were inspected about the same time, and no individual or company could feel he was being discriminated against.

It was also a campaign of education, for there seemed to exist throughout the state, to a large degree, a professional ignorance relative to the laws governing the employment of minors. This we have endeavored to eliminate, and feel there is no excuse at this time for employers to plead ignorance of the law when found violating the provisions thereof.

The result of our year's work leads me to believe this is the proper course to pursue. I am of the opinion, however, that this can only be done systematically and thoroughly by having special inspectors appointed to enforce the provisions of the child labor laws, and I believe

this work can be as well done, if not better, by women. This would enable the regular inspecting force to give their entire time and attention to the inspection of factories and buildings.

I would therefore recommend that provision be made for the appointment of not fewer than six women inspectors, whose duties would be to visit factories, workshops, and mercantile establishments employing women and children to see that the laws providing certain specified privileges for women employes, and the minor labor laws are enforced.

For the first time since I have been connected with the department, our attention has been called, during the past year, to violations of the law which makes it unlawful for a person or company to retain or withhold the wages, or any part thereof, of a minor because of presumed negligence or incompetency, and I am pleased to report that in every case we were able to secure full payment without resorting to the courts.

PROSECUTIONS.

During the year we have had occasion to prosecute three cases for the violation of the child labor laws. In each case a plea of guilty was entered, and a fine and costs paid.

RECAPITULATION.

1. Section 4022-2, Revised Statutes, should be amended to provide for uniform age and schooling certificates to be issued throughout the entire year for all minors who labor in factories, etc., in this state.

2. Section 6986-1, Revised Statutes, should be amended to define the various occupations at which minors under the age of sixteen years cannot be employed.

3. Not fewer than six additional inspectors should be provided for, at least a fair percentage of whom should be women.

4. Provisions should be made for an inspector to give his whole time and attention to High Explosives.

5. The bakeshop law should be amended so as to prohibit the use of cellars and basements for bakeshop purposes.

I take this opportunity to express to the Department of the Attorney-General my sincere appreciation of the able advice and assistance rendered us in interpreting and enforcing the laws coming within the jurisdiction of this department.

To the district inspectors I extend my congratulations on their work for the year, and take this opportunity to thank them for their co-operation in endeavoring to carry out the provisions of the statutes under which the department is organized.

I also desire to thank the members of the office force for the cheerful

and careful manner in which their share of the work during the year has been done.

Respectfully submitted,

J. H. MORGAN,
Chief Inspector.

STATISTICAL TABLES

THIRTEENTH ANNUAL REPORT OF THE TRUSTEES OF THE MASSILLON STATE HOSPITAL.

To the Governor:

In presenting the thirteenth annual report of the Massillon State Hospital, for the fiscal year ending November 15th, 1905, we would first record our gratitude to the Omnipotent Jehovah for His gracious providence which has constantly watched over this institution. Threatened epidemics have been averted, and the destroying angel has turned aside almost without any mark of his dreaded visitation. General good health, comfort and comparative satisfaction has prevailed all the year. The ground has brought forth plentifully, our barns and store houses are filled and our labor has been greatly rewarded.

We would also express our gratification in the unbounded confidence manifested by the executive head of the State, from the fact that he has not found any occasion for complaint of the conduct of this institution. We regret that you have not found time to visit and personally inspect this latest addition to our State Institutions, and satisfy yourself of its utility, and with the manner of its management.

BUILDINGS.

The last one of the new buildings authorized by the act of April 25th, 1904, is substantially completed, and will be wholly finished and ready for occupancy at an early date. To carry out the original design there remains to be erected one large fire proof building, specially designed for a sick hospital. Such a building is necessary in order that the men and women may be entirely separated. Whether this legislature can be convinced that such a building is sufficiently important at the present time to warrant the necessary outlay of money, is a question for the individual representatives to determine. It will be built, if not now, by some future legislature, to which the great honor will be due.

CONSERVATORY.

Fear of a deficit alone, caused the Governor to withhold his approval of the appropriation made by the last General Assembly for the erection of a conservatory. The necessity for such a building is too apparent to waste any argument on the subject, and we simply call attention to the situation, confident that the Legislature will again make ample provision for its immediate construction.

PIGGERY.

For the same reason another important item was eliminated from our appropriation. The odor arising from an aggregation of seven hundred live hogs seems to be very objectionable to the public using the highway, along which this most valuable collection is housed and fed. The State now owns suitable lands on which such a building can be placed, and in this way abate the nuisance now causing so much complaint. An epidemic of cholera now prevailing in the herd makes a change of location even more imperative.

ADDITIONAL LAND.

Aside from its universally admitted value as a remedial agent for this class of persons, it has been fully demonstrated that patients' labor judiciously applied in out-door employment can be made profitable to the State by producing the crops actually necessary to feed this large and constantly increasing population. Not this alone, but it insures to our people an ample supply of good, fresh vegetables in their season, so difficult to obtain in sufficient quantities by purchase in the open market. The land now owned by the State has been found insufficient for this purpose. It is not always possible to obtain desirable lands at reasonable prices. There is now on the market a tract of one hundred and fifty acres adjoining the present State farm, which can be purchased at a fair price. This land extends to the canal and river, thus insuring an unfailing supply of water, for which we are now wholly dependent upon wells. It has also large and valuable buildings, which can, at a comparatively small cost, be arranged for a home for farm laborers, and the barn is much needed for shelter of stock.

SEWAGE DISPOSAL.

The ever important question of sewage disposal must be solved within the next few months. The present system is no longer adequate, and must be enlarged. The sewage beds are unfavorably located, and solely for the reason that there was no better place on the land owned by the State at the time they were constructed, and will, at some time have to be removed. If this can be done now it will result in material saving to the State in the next year.

The acquisition of the additional lands already recommended will afford an easy and practical solution of this question. A suitable site will be obtained sufficiently removed from the main building to avoid the objection, now too apparent, from the present location. We cannot too earnestly urge the pressing need for the immediate change. If the present opportunity to obtain this additional land is neglected there seems to be little expectation of securing a like favorable purchase in the future. The city is extending in this direction, and very soon these lands will be so occupied as to prevent the State acquiring them at any price.

In every view of the situation we are fully persuaded, as we believe the Legislature would be on actual view of the premises, that it would be an act of wisdom and foresight approved in all future time, to secure the additional land now offered to the State.

ORDINARY REPAIRS.

It is obvious to every one on a moment's reflection that the furniture, fixtures and buildings are not used with the same care that such things would be in private homes, occupied by sane people. The demand for repairs is constant, unavoidable and attended with heavy expense. Some of the buildings have been occupied for several years, and should have more thorough repairs to prevent future loss. All the buildings should have fly screens, and as a matter of economy they could be made with copper wire. Whether these items are charged to current expense, or to a separate fund, ample provision should be made for the same during the coming year.

BIENNIAL REPORTS.

As our report of last year has long since passed into a state of "innocuous desuetude," we may venture to repeat some suggestions offered in that paper. The practice of making annual reports had its origin when we had annual sessions of the legislature, and has been continued without any sufficient reason. These reports are made through courtesy to the Governor, but are intended primarily for the information of the General Assembly. Now as the Legislature having control of the funds holds only bi-ennial sessions the reports and recommendations of the Trustees of these Institutions for the second year of the bi-ennial term, are the only ones that reach the legislature, and if the reports for the first year should contain anything of special importance it must be repeated in the second year's report.

Appropriations are necessarily made for two years, and many contracts are made for the same time, or for a term covering part of both years, therefore reports made in the middle of the biennial period are partial and unsatisfactory. The labor of preparing such reports is an unnecessary burden upon the persons required to prepare them, especially when it is known that they speedily find their way to the waste basket and the refuse heap. The cost of printing, binding and distributing such reports, as ascertained from the Auditor's office, is approximately $————, all of which could be saved to the State Treasury without detracting in any manner from the welfare of the institution. We would respectfully recommend that the law be changed so as to require only biennial reports.

SPECIAL APPROPRIATIONS.

We would also call attention to the inconvenience and frequent disadvantage of the present mode of parcelling the appropriations for these

institutions under numerous titles for different purposes. There is nothing gained or saved by this practice, and there is often great inconvenience as well as actual loss by this plan. These different estimates may be valuable in determining the aggregate of the amounts necessary for the maintenance of the several institutions, but when that amount is fixed it would be better to leave the distribution thereof to the discretion of the men charged with the responsibility of managing and controlling all the operations of the institutions for which such provision is made.

While we could not think of calling in question the wisdom or good intention of the Legislature, we are convinced by actual experience and observation that the brief and necessarily hurried investigation possible for any committee charged with such duty cannot enable the General Assembly to distribute the apropriations with any certainty, nor to provide for the contingencies that are constantly arising in the management of such peculiar and uncertain business.

On the other hand, the men chosen by the Governor for this special work are in constant touch with its operation, and are in a position to judge with more accuracy the actual needs, and ought not to be handicapped by such unnecessary limitation. While many thousands of this appropriation may lapse, which often occurs, the Trustees are unable to provide some important and valuable additions because that special fund is exhausted. The aggregate of the several items of the appropriation is at best but an indication of the amount the Legislature has determined to expend for this particular purpose, for the reason that an emergency board has been created, for expense found absolutely necessary beyond a specific appropriation. This is cumbersome, expensive and often unsatisfactory, and could easily be avoided by the plan suggested. Such a plan is in successful operation in other States, and would certainly be an improvement on our present system, and would free boards of trustees from the suspicion, implied if not expressed, by the limitations of the present mode. The detective work being done, under the garb of inspection, ought to be sufficient to keep the State authorities fully advised of any folly or waste on the part of such boards, if there should be such were the specific limit removed.

REPORT OF OFFICERS.

We transmit herewith the comprehensive and suggestive report of our efficient Superintendent, Dr. H. C. Eyman. It is valuable alike to the Executive of the State, the Legislator, the Specialist and the public generally, and we recommend it to the consideration of all persons interested in the management of hospitals for the care and treatment of the disturbed classes.

The report of the Financial Officer sets out in detail the operations of his department. It affords a concise view of the articles purchased, their varieties, quantity and cost, thus affording satisfactory evidence of

the provision made for the benefit of our people. An examination of these items should convince any one that the charge of improper or insufficient food is entirely groundless.

CONCLUSION.

Perhaps the most interesting fact we have to report is the great reduction in the cost of maintenance of our people. A combination of favorable conditions has enabled the management to reduce the per capita cost of maintenance to the unprecedented low figure of $108.70. While this is cause for congratulation, in view of the fact that it has not been accomplished by diminishing in any manner the abundant supply of every thing needful for the comfort and health of the patients, yet we could not advise that this amount should be taken as a basis of estimates for the future. A comparative failure in the production of the farm or a material advance in the open market would again increase the outlay beyond the present figure. The very large unexpended balance of the appropriation returned to the State Treasury for the last two years, is evidence of care in expenditure, and that the same caution is certain to be exercised in the future.

Respectfully submitted,

S. J. McMahon,
Geo. D. Copeland,
J. B. Zerbe,
J. S. Ellen,
John E. Russell,
Trustees.

November 15, 1905.

LIST OF REQUIREMENTS FOR 1906.

Current expense, 1,550 patients, $125 each	$193,750
Officers' salaries and trustees' expenses	10,500
Ordinary repairs and improvements	20,000
Furniture and carpets	2,500
Tunnels, grading and cement walks	6,000
Books, pictures and instruments	1,000
Cow barn and piggery	5,000
Pipe, pipe covering, wiring and electrical fixtures	5,000
Construction Cottage, and furnishing same	35,000
Additional laundry machinery	3,500
Conservatory	5,000
Purchase of land	30,000
Finishing interior of power house	2,000
Extension sewage plant	12,000

FOR 1907.

Current expense, 1,600 patients, $125 each	$200,000
Officers' salaries and trustees' expenses	11,500
Ordinary repairs and improvements	15,000
Furniture and carpets	2,000
Pipe, pipe covering, wiring and electrical fixtures	5,000
Tunnels, grading and cement walks	6,000
Construction of hospital building and furnishing same	125,000

SUPERINTENDENT'S REPORT.

To the Board of Trustees, Massillon State Hospital:

GENTLEMEN: — I respectfully submit the thirteenth annual report of this hospital.

SUMMARY OF MOVEMENT OF POPULATION.

On the date of my last report, November 15th, 1904, there were remaining in the institution 1,363 patients, of whom 719 were men and 644 were women.

There were admitted during the year 404 patients, of whom 247 were men, and 157 were women; the whole number under treatment was therefore 1,767. There were 390 discharged during the year, of whom 232 were men, and 158 were women. Of this number 136 recovered, 57 were discharged improved, 13 unimproved, and 184 died. Of those recovered 84 were men and 52 were women. Of those improved 34 were men and 23 were women. Of those who died 106 were men and 78 were women.

The percentage of recoveries on the number admitted was 33.66. The percentage of deaths on total number under treatment was 10.41.

The causes of death were as follows:

Organic Brain Disease	15	Inanition	11
Paresis	26	Gastric Tumor	1
Senile Dementia	57	Gastritis	2
Tuberculosis	13	Pleuro-pericarditis	1
Apoplexy	15	Erysipelas	2
Organic Heart Disease	5	Septicemia	1
Epilepsy	3	Exhaustion	6
Asphyxia	4	Brain Tumor	1
Traumatic Injury	2	Acute Laryngitis	1
Appendicitis	1	Tubercular Peritonitis	2
Chronic Bright's Disease	2	Carcinoma	1
Broncho Pneumonia	2	Acute Peritonitis	1
Pneumonia	8	Typhoid Fever	1

AGES OF THOSE ADMITTED.

Between 10 and 15 years	1
Between 15 and 20 years	15
Between 20 and 25 years	22
Between 25 and 30 years	38
Between 30 and 35 years	38
Between 35 and 40 years	53
Between 40 and 45 years	44

Between 45 and 50 years	44
Between 50 and 60 years	68
Between 60 and 70 years	61
Between 70 and 80 years	15
Over 80 years	4
Unknown	1

The reported duration of insanity of those admitted was as follows:

Under 1 month	97
Between 1 and 3 months	77
Between 3 and 6 months	71
Between 6 and 9 months	24
Between 9 and 12 months	4
Between 1 and 2 years	34
Between 2 and 3 years	20
Between 3 and 5 years	22
Between 5 and 7 years	7
Between 7 and 11 years	5
Between 11 and 15 years	2
Over 15 years	12
Unknown	29

Of those admitted during the year there were native born 301, foreign born 77, unknown 26. Of those remaining there were probably curable 73, possibly curable 160, chronic and probably incurable 1,041.

The recovery rate based upon total admissions, which include transfers from County Infirmaries, was 33.66. Based upon acute cases received from their homes was 66 per cent.

While not exceedingly high yet we regard this as fairly satisfactory, and in line with progressive work. Appliances have been constantly introduced tending to the recovery of patients. The Superintendent's report of any given institution will show a large recovery rate one year, and probably a small one the succeeding year.

Taken year after year, however, the average recovery rate of the most progressive institutions will show about 33 per cent. of admissions. The statement made by some superintendents that year by year the rate is lessened, and that it is accounted for by the changes in the form of insanity, is not, in our opinion, substantiated by the facts. The claim is made that the present forms of insanity tend more to the asthenic types, and consequently to depressed phases and fewer recoveries. It has been a trite saying for years, that "Melancholia is the sanest kind of insanity," and the conclusion necessarily follows that the pathology is of less magnitude. In the old classification of mania, melancholia and dementia we were taught that mania was simply a deeper stage of reduction of the same pathological process, consequently a more violent disturbance of the mental equalibrium. Therefore the argument that the more sthenic forms of insanity resulted in a higher recovery rate is not borne out by actual conditions. Neither is it proven that the

recovery rate is actually lessening. If the great and malign influence of the one protean malady — Paresis — could be excluded, I believe the recent progressive methods of treatment would make the recovery rate climb steadily higher. While we are unable to bring to your notice any new drugs which can be mentioned of special therapeutic value, yet we are convinced that the more recent methods of applying hydrotherapy, electro-therapy and vibrassage have been productive of much good, and that many patients have been started on the high road to recovery because of these agents properly applied. We are now well equipped in this department, and the beneficial effect of treatment along these lines is only limited by the time and resourcefulness of the physician in charge The results have more than met our expectations. Of course the indiscriminate use of such treatment must necessarily be a disappointment; but carefully selected cases, and intelligently applied technique, will surely be productive of increased comfort to your chronic patients, and prevent your acute cases from drifting into chronicity. It is probable that the overcrowding of which so many institutions complain may be due to the fact that patients are better cared for, consequently live longer, and to the further fact that the public has more confidence in the character of the treatment, and in consequence persons are adjudged insane and committed to the State Hospitals who were formerly cared for by friends or in private institutions. This is particularly true of aged persons who could be cared for at home, and who would be if the relatives did not believe that they could have better care in State Institutions than they could give them at home. The alarming cry concerning the rapid increase of insanity out of proportion to the increase in population has been sounded so regularly that I fear we as Superintendents have got the "alarm" habit.

For years I think this cry had justification in fact, but a close analysis of statistics and conditions apparently shows an actual diminution in the proportion. The New York Commission in Lunacy has published a statement giving the number of cases of insanity committed in New York State since 1874, and while the figures show a steady and alarming increase, a close analysis tends to show a better condition. For instance in 1887 the number of *new cases* committed was 4,700, with a total population of 5,500,000, or one new case to every 1,170 people. In 1902, while there was an exceedingly large increase in cases committed, yet the number of *new cases* was only 5,100, with a population of 7,500,000, or one new case to every 1,470 people. My own observation in Ohio tends to corroborate this view.

NURSES.

The efficiency of the nursing corps is sometimes marred by the unfaithful and volatile nurse, who flits from one institution to another and deserves the appellation of "Asylum Tramp." All institutions frequently

hire nurses from written applications, and occasionally one of these peripatetics will secure a position, remain a month or two, and after comparing the institution with the dozen others in which he has worked — no not worked, rather slept and rested — departs for more "congenial climes," leaving behind him more or less disquiet and dissatisfaction for those less inclined to travel. Their coming is a menace, and some means should be adopted by those in charge of institutions to curtail the danger from employing this class. We are glad to say, however, that the great majority of our nurses have gone into the work with heart and spirit, and to them we are especially grateful for their conscientious co-operation in our endeavors to cheer and comfort the ill and distressed. In this connection I should like to suggest the desirability of placing more women in care of men's cottages. While we believe that all nurses are developed and broadened by judicious training, yet we are of the opinion that the most useful nurse must be a good conscientious woman. There are qualities of womanliness, ability to care for the housekeeping department, together with kindness, compassion and the "Angel of Mercy" like touch which make the woman pre-eminently the bedside comforter.

TRAINING SCHOOL.

To the regular didactic lectures, given by the assistant physicians, we have added clinical bedside lectures, given by the supervisor of nurses. The curriculum has not been materially changed. The trend of recent training schools has been toward a higher educational plane, and while we believe this should not be discouraged, yet we fear that it may be possible to so educate the head that the hands and heart may be overlooked. Practical nursing requires practical instruction, and it certainly will to a greater degree conduce to the comfort and welfare of the patient, if the nurse knows how to make up the bed so as to free it from wrinkles, knows how to arrange the ventilation of the sick chamber so that the patient may have the benefit of pure air, without the disadvantage of a draft, than to be able to mention accurately all the bones that make up the wrist joint, or to follow the various branches of the fifth nerve to the ultimate nerve endings. Practical bedside instruction in the multitudinous methods of caring for the diseased, *must* supplement didactic instruction, else your training school will not have accomplished its greatest good.

EMPLOYMENT AND DIVERSION.

Without proper means for employment an institution for the insane could soon take on the characteristics of a prison. It is just as essential that our charges have outdoor air and exercise, as that they have careful medical attention. Nothing so revivifies as oxygen, and this can not be obtained in its purity inside the house. Next to employment diver-

sion is most important. Frequently we are asked the particular value of this kind of an entertainment, or that kind. We answer, anything that will divert the mentally ill from their real or imagined troubles is of great value as a therapeutic agent. We have been able to keep a large force of men at work on the farm, the grounds, the garden, in the shops, kitchen, dining room and laundry. The women find outlet for their surplus energy in the kitchen, laundry, dining room, and in fancy work, or house work in the cottages. Over 1,500 quilts have been made the past year.

As amusements we have had baseball, tennis and croquet during the summer months, and bowling, card parties, theatricals, at homes, concerts, etc., in the winter season. Of course our regular weekly dance is held throughout the greater portion of the year.

On November 16th Mr. W. H. McCollin, the blind entertainer, who has been scattering sunshine for the past thirty years among those from whom some of the glories of living have been shut out, because of their mental illness, gave an unusually instructive and humorous program.

On December 24th the Hospital Dramatic Club presented "The Deacon's Tribulation." Perhaps no class of entertainment is more effective than that given by our own people. Our dramatic club is composed of employes, having more than ordinary histrionic talent, and never do anything without doing it well.

February 17th, Masquerade Ball, under the efficient management of R. C. McCauley of Cleveland. Mr. McCauley is at home in this kind of entertainment, and the evening was a complete success in every particular.

Perhaps the most thoroughly enjoyed entertainment of the year was Prof. Leonard's stereoscopic views of the Grand Canyon, and word pictures accompanying them. This entertainment was given March 7th.

Other stereopticon lectures by the Superintendent, chalk talks, a concert by the Amphion Chorus 150 strong, Fourth of July celebration, musicales, etc., were given during the year.

INEBRIETY.

Each added year tends to confirm us in our frequently expressed opinion that inebriety is surely the forerunner of insanity. As alcohol is the product of dissolution, the wreck, the disorganization of human food, so its effects upon man inaugurate dissolution, wreck, disorganization and decay. It is the product of decomposition, and it in turn is the herald of destruction. It has the same origin as the malignant and fatal exhalation of the pestilence — the death and putrefaction of organic substances. It is not a food, and only stimulates by its poisonous action. Nature makes one stupendous effort to rid herself of this noxious substance not intended for her use, the heart, the lungs, the blood vessels are all goaded to supreme exertion to drive out the interloper: the brain

is stimulated because on account of nature's effort she drives more blood through the brain, thus inducing superlative activity. Now is it any wonder that so virile a poison should produce mental alienation? Heredity and drink are the two overwhelming factors in the production of insanity, and frequently hereditary insanity is traceable directly to dissipation in the ancestor. Then, if we analyze the other causes assigned as the factors producing insanity we will find that in nearly all alcohol is again an important factor. Domestic trouble is frequently assigned as a cause of insanity, but when we investigate as to the cause of the domestic trouble we find it is the ubiquitous alcohol, and so with exposure and ill-health. A man becomes intoxicated, takes improper care of himself, takes cold, has congestion of the lungs, or congestion of the brain, loses his mental balance, and the assigned cause is exposure. It is utterly impossible to obtain statistics even approximating the percentage of insanity caused directly and indirectly by this malign influence, alcohol.

PATHOLOGICAL WORK.

Our pathological department has been under the care of Dr. J. D. O'Brien, and has been capably and conscientiously administered. The pathological department was established for the purpose of providing the Hospital staff with the facilities for scientific work directly connected with their cases. Our pathologist has already done considerable original investigation, and we hope soon to be able to give the profession some of the results of his labors, but of course, as stated above, the chief reason for the existence of this department is for its aid to diagnosis. It necessarily means a closer study of the individual case, and consequently helps to avoid the "institution rut" known as "case massing." Without this individual study, physicians are apt to become somewhat careless, and prescribe as a part of routine work, without proper investigation as to the patient's especial needs. The work of an assistant physician is necessarily more or less routine, and he requires the incentive given him by the pathologist to breast the waves of indifference and to overcome the inertia of the institutional habit.

STAFF MEETING.

For years we have made it a rule to have staff meetings at eight o'clock each morning, and once each week a medical paper on a topic chosen by the writer is presented. Histories of cases of especial interest, post mortem findings, and pathological investigations are also read and discussed. Each physician is required to discuss the papers. Much interest is manifested, and scientific work is encouraged by these meetings. Our pathologist, in addition to his work in the laboratory, writes the clinical history of the most important cases, thereby connecting the pathological directly with the practical work of administering to the sick.

IMPROVEMENTS.

There have been many important improvements during the year. Much has been done in grading and planting of trees and shrubbery, thus adding materially to the natural beauties of the landscape. Six thousand feet of cement walk has been laid. Cottage No. 5 is about completed, and will be ready for occupancy about the middle of December. We have added to our armamentarium vibrassage, electrotherapeutic and hydriatic apparatus. These we regard as the most important additions to the therapy of mental diseases which have been developed in recent years.

We have given these means of treatment very thorough trials, and can testify to the almost universal benefit derived from them. Patients who heretofore have been allowed to drift into chronicity, or at best have made tedious convalescence, have responded promptly to treatment, and recoveries little short of marvelous have occurred.

A magnificent Russell engine 450 H. P., and a Westinghouse generator 300 K. W., have been installed. Our power plant is now in excellent condition, and has a capacity sufficient to fulfill all the requirements of the hospital for years to come.

REQUIREMENTS.

Our needs for the ensuing biennial period will not be unusually great, but in order to keep up to our present standard we must have some special appropriations.

The crying need of all the State Institutions is more land. We can now purchase, at a reasonable figure, the tract of land lying immediately west of the hospital grounds, consisting of about 150 acres. This tract extends to the canal on the west, and would give us a fine wood lot sloping to the canal.

It is also absolutely essential that our present sewage plant should be extended. The extreme capacity of the present plant is 75,000 gallons of sewage daily, while we are actually emptying over 250,000 gallons of sewage upon it every 24 hours. The original plan for this plant called for four acres. But one acre has been prepared, consequently the beds are greatly overworked. We have had an expert sanitary engineer investigate the conditions, and find, to extend the present beds, will require at least $12,000. If the farm above mentioned could be secured this extension could be made for about $3,000 less.

We have also outgrown our laundry. It will be necessary to build an addition, and install new machinery.

No appropriation for conservatory has been made for this institution. Nothing so adds to homelike surroundings, and brings the wandering mind back to sane conditions, as flowers.

Our neighbors have justly complained about the location of our pig pens. They adjoin the public highway, and should be removed.

We have been steadily increasing our herd of cows until we now have over thirty. We should have at least 100 more, and with the additional land asked for and a barn for their care, we could furnish all the milk required for the institution at a very greatly reduced cost.

EXPENSES.

The per capita cost per annum, exclusive of officers' salaries, and based upon amount drawn from the State Treasury, was $108.70; including officers' salaries, $114.84; per week, exclusive of Officers' salaries, $2.09; including officers' salaries, $2.20.

The per capita cost since the opening, inclusive of officers' salaries, was: 1899, $214.29; 1900, $168.29; 1901, $141.81; 1902, $144.30; 1903, $149.83; 1904, $139.40; 1905, $114.84.

The per capita cost this year is very much the lowest in the history of the institution. This is accounted for largely by our increased number of patients, the bountiful supply from our farm, and the great saving in fuel on account of railroad switch. In this item alone we have effected a saving of about $18,000. Our dietary has been carefully followed, and revised each month to suit the product of the season, and nothing which would enhance the comfort and welfare of the patients has been denied them.

OFFICIAL STAFF.

There have been no changes in our official household. Mr. Barry Dudley continues to serve the State as Steward.

Mr. Harry Richeimer, as store keeper, ably assists Mr. Dudley. Their department will be found in excellent condition, and I cheerfully bear testimony to their industry and ability.

Drs. Brown, McGeorge, O'Brien, Harris and Vaughan continue to perform the important duties of assistant physicians with promptitude and efficiency. I cordially commend them for their progressive work, and unfailing kindness to their unfortunate charges.

ACKNOWLEDGMENTS.

I wish to thank the members of the Mrs. McKinley Tent, Daughters of Veterans, for the interest manifested in our old soldiers, by their appropriate exercises and uniform kindness to them on Memorial Sunday. Also the soldiers of Hart Post No. 134, under whose auspices these exercises were held, and to Mrs. Purington, who so kindly sang for us upon that day.

Our thanks are due Prof. Faust, of Canton, for a delightful evening with his "chalk talk." We wish also to express to the ministers of

Christ's Gospel, who have so cheerfully given us their time and talent, our appreciation of their zeal and helpfulness.

To our friends, citizens of Massillon, who have so bountifully supplied us with magazines and periodicals, to the attendants and employes generally, I wish to express my obligation for their continued interest in the welfare of the patients, and for their arduous labors well done.

In conclusion, Gentlemen of the Board, I desire to take this opportunity to thank you for the trust which you have committed to my care, and for the confidence you have at all times manifested, and for the privilege of a wider field of usefulness. There are times when the great responsibility of caring for more than a thousand of our unfortunate fellow beings rests heavily upon me. Your constant aid and cordial support lightens the burdens, and I wish to thank you again for this support and for the many manifestations of good will to myself and family.

Respectfully submitted,

HENRY C. EYMAN,
Superintendent.

November 15, 1905.

PATHOLOGIST'S REPORT.

DR. HENRY C. EYMAN, *Superintendent:*

I take pleasure in submitting a brief report from the Pathological Department for the year ending November 15th, 1905.

The work here continues to progress, and an endeavor is made to conform and carry out certain plans which were previously formulated, this has been to a certain extent aided by the acquisition of new apparatus and necessary equipment.

Every day furnished additional evidence of the necessity of a pathological laboratory in connection with our hospital, both as an aid to diagnosis and a means of study of some of the more intricate problems met with in our specialty, for this reason, the fact is ever before us, that in the laboratory is held the key to a more thorough understanding of the different diseases, processes and to an improvement in the present plans of their treatment and care.

Of course, minor obstacles are met with in the cultivation of our plans, among these, the lack of sufficient time, if more time could be obtained it is possible better work could be done; it would indeed be a cause of great regret on my part if there should seem to be any disposition, to diminish in the least, the importance of research in pathological anatomy, again, while we are handicapped for room, we are content with thoughts of the possibility of a larger building in the future.

Post-mortem examinations were made on 20 cases, the majority of which are exceedingly interesting. Gross specimens when considered of sufficient interest were preserved and in some of the more interesting conditions a systematic examination was made of different organs while special attention was given to the nervous system.

Much time has been devoted to a study of the bacteriological side of Dementia Paralytica, some very interesting observations have been recorded, an account of which was published in "American Medicine" a few months ago, while we felt rather doubtful at first regarding their validity, we now feel that we are able to attach far greater importance to them than heretofore.

The work continues and is most stimulating for further researches in this direction, and will in time give us a more thorough understanding of this as yet incurable malady.

In the clinical department the work continues as outlined in our previous report, cases are read before the staff, they are thoroughly discussed, and in this way a more intimate knowledge is gained of the

patient in question, together with which a stimulus is afforded for a more thorough study of psychiatry.

Respectfully submitted,

JOHN D. O'BRIEN,
Pathologist.

FIFTIETH ANNUAL REPORT

OF THE

Board of Trustees and Officers

OF THE

Boys' Industrial School

(Lancaster, Ohio.)

TO THE

Governor of the State of Ohio

FOR THE

Fiscal Year 1905.

Vol. III. 35 EX. D.

REPORT OF BOARD OF TRUSTEES.

Hon. Myron T. Herrick, *Governor:*

Dear Sir: — The trustees beg to submit herewith the annual report of the Boys' Industrial School for the last fiscal year, ending November 15, 1905. In submitting the same it gives the trustees great pleasure to state that we believe the school in all its departments is in a more advanced and useful condition than it has been at any time since its organization. While this is true of the physical condition, we are certain that the educational feature has had more attention at our hands. The Central school building, under construction when the last report was filed, has been completed and occupied. This building was greatly needed for the furtherance and betterment of the schooling of the boys. By the means now afforded, it is possible to give better instruction since all are assembled together and graded, under the immediate direction of the Principal, and the same methods which prevailed under our common school system can be utilized with profit, the boys taking up regular studies on entering and pursuing the course until released, when further work can be taken up and completed in the school at their homes.

The new hospital is practically completed. This building was very much needed, and will aid greatly in caring for the boys when sick or disabled.

Other buildings under construction, for which appropriations were made by the last Legislature, consist of one cottage and a dairy barn. These are well under way, and will be completed early in the year.

The trustees are gratified to report that the finances of the institution are in excellent condition, and the per capita below that of last year. This has been brought about by a continuance of the same business principles which have prevailed for some years. The purchase of all supplies, as far as possible, has been made under the competitive system.

The health of the boys has been more than excellent. Only one death occurred out of an average population of 880.

Details of the work of the institution are fully and particularly set forth in the reports of the Superintendent and financial officer, attached to this report and to which we call attention.

We acknowledge the kindly assistance rendered by you in the management of the School. Your personal presence at times and words of suggestion were greatly appreciated.

In closing this brief report the trustees desire to compliment the Superintendent, Col. C. B. Adams, for his faithful labors and intelligent performance of duty. He has ever been willing to carry out the action

of the trustees, and is entitled to these words of commendation at our hands. Our thanks are also due Captain W. N. Hilles, the financial officer, for the business judgment he has exhibited in all of his work.

With our best wishes, we are,

Respectfully yours,

R. S. WARNER,
JOHN L. VANCE,
WM. J. AKERS,
J. J. PUGSLEY,
WILLIAM BEATTY.

Lancaster, November 22, 1905.

SUPERINTENDENT'S REPORT.

To the Honorable Members of the Board of Trustees:

GENTLEMEN: — I have the honor to submit the fiftieth annual report for the year ending November 15, 1905, and to transmit the reports of the various departments in the institution. This institution has been in existence a half a century, established in 1855. With a beginning of ten boys from the Cincinnati House of Refuge, it has during the years of its existence sent back to society very nearly 12,000 boys, a large per cent of whom have become useful members of society, and in their lives have reflected credit upon this school, and the wisdom of the state in establishing an institution of this kind.

On November 15, 1904, there were 877 boys in the institution; during the fiscal year 469 were received, making a total cared for of 1,346 against 1,337 cared for last year. The number sent out for all causes 430, and one death. Boys have come from practically all of the counties in the state,— Cuyahoga having sent the largest number 95, Franklin County 55, Lucas County 35, and Hamilton County 22. The small number from Hamilton County is accounted for by the Juvenile Court sending practically all their small offenders to the House of Refuge. Large boys, who were at one time sent to this institution from the police court, are now being sent to the work house, the Juvenile Court not having jurisdiction of boys over sixteen years of age (and under the Juvenile Delinquent Act boys are not supposed to be committed to this institution when past that age.)

Of all boys received there were 209 of American parentage, 55 Afro-American, 226 foreign parentage, and 14 parentage unknown. This shows a large increase in boys of American parentage, and a decided decrease in boys of Afro-American patronage, and a large decrease in boys of foreign parentage. The number of the latter committed to the institution for the year ending November 15, 1904, was 297 against 209 of this year. Of the 469 received 149 were committed from the Juvenile Court, 194 from the Probate Court, and 41 from the Common Pleas Court; 138 were committed as "juvenile, disorderly persons," and 126 for petit larceny. As mentioned in my last report the term "juvenile, disorderly persons" is somewhat vague. This is supposed to apply to a boy, who has absented himself habitually from school, or while at school is incorrigible, vicious or immoral. Yet, a number of boys guilty of serious crimes have been sent here as "juvenile, disorderly persons." In an institution of this kind where boys should be classified according to

offenses, and boys guilty simply of truancy not located in families with criminally inclined boys, it makes it almost impossible to properly classify and separate these lads.

The health of the inmates has been remarkably good, only one death occurring out of an average of over 880 boys. The best of care has been given to sick boys. We attribute the good health of the inmates not only to our healthy location, but to the good sanitary condition of all buildings and cottages. We lost during the year one officer by death, Mrs. Putnam, who for a number of years was the efficient matron of the hospital. In her death the institution lost one of its best and most faithful officers.

The total disbursement through Current Expenses, Salaries, Rewards, Carpet and Furniture Funds was $138,072.08. The total average attendance was 880.18, and the cost per capita for the year was $156.87, a decrease from the per capita cost of last year. Every effort is being made to keep down expenses, and economy is exacted of all officers in all departments. I find on investigation that the per capita cost of forty similar institutions north of the Mason and Dixon line during the last fiscal year averages over 200.00.

As in former years, boys committed for truancy attend school all day. All other boys attend school half a day, and are employed at a trade or farm work the other half. We keep up the following departments, to which boys are assigned soon after entering the institution, as soon as it can be determined to what kind of work they are best adapted: Plumbing, printing, carpentry, brick making. electrical and steam engineering, butchering, blacksmithing, shoe making, laundering, cooking, baking, painting and glazing, tailoring, and telegraphy.

Boy labor has burned all brick, quarried all stone, put in foundations, made roads, done farm work, put in plumbing, done the blacksmithing, and in a large measure taken care of all work, skilled and unskilled, required in an institution as large as this.

We completed during the year the Nash Cottage, school building, built slaughter house, have hospital nearing completion, and new cottage under way. We hope to have new cottage completed by February, 1906. Work on new dairy barn has been commenced. The steam tunnels have been extended to new cottage and hospital; steam and water lines have been overhauled and repaired; steam line to new school building has been enlarged; high and low pressure lines have been extended to new hospital; water mains have been extended to new school building, and two hydrants placed on the outside of the building for fire protection. A great deal has been done in the way of ordinary repairs and improvements,— new floors put in, walls papered and painted, and all woodwork painted on the outside. The central steam plant has been put in an excellent condition. Four boilers were thoroughly repaired, and new burners put under one battery of boilers. The building has been

painted inside and out; walks made to and around building. New streets have been graded and paved wherever necessary. On the farm new fences have been built and old ones repaired. A great part of this labor has been performed by boys under the direction of their officers.

We have regularly observed all the holidays. Accepting an invitation from the people of Lancaster, the regiment took part in the parade and their local celebration on the 4th of July. Besides observing the regular holidays, we observed Chestnut Day and Military Day, which is devoted to competitive drills between the different companies. The boys greatly appreciate these holidays.

As in former years, religious services are held each Sunday, Sabbath School in the morning, and preaching in the afternoon, which services all are required to attend. The Ministerial Association at Lancaster furnishes a minister for afternoon services, and once a month a clergyman from the Catholic Church holds services for the Catholic boys. Thus all denominations are represented, making our school strictly non-sectarian.

The Parole Law passed by the legislature two years ago has been in effect since May, 1904, practically a year and a half. During the year from November 15, 1904, to November 15, 1905, we have released and paroled 430 boys. In the same period 71 boys have been returned for violation of parole, a number of which were paroled the previous year. Practically all paroled boys have been visited by the Parole Officer — some four or five times. The Parole Officer has kept in touch with them, assisting in securing employment for some, and investigating homes for boys before they are paroled. He has seen that all boys of school age are in school, and one very particular feature of his work is looking after boys who have been placed in homes, seeing that they are not abused there, or by parents. His work has been altogether satisfactory. Time has shown the wisdom of a parole system for this institution.

This has been a successful year in the schools. Under the guidance of a Principal of Schools, with a corps of efficient teachers, the schools have made great progress. With the exception of truants, who are in school all day, all boys are in school half a day, and have employment the other half. During the busy season in summer a large number of boys are required in the gardens, orchards, on the farm and in force. The grades then are in turn taken out of school several weeks at a time to aid in this outside work. On October 31st twelve half day schools were transferred from school rooms in the cottages to our fine, new school building. The great advantage to the institution in having a central school building is already apparent. The Principal's office is there, and he is in close touch with teachers and pupils. The teacher can give closer attention to pupils, not only in school room, but in the halls, and the janitor looks after them in toilet rooms, so at all times

the boys are under the direct supervision of teacher or officer. New text books in geography and arithmetic have been purchased, and have been well received by teachers and pupils. New academic dictionaries have been placed in all school rooms, giving the pupils a handy reference. We should have wall maps in each room, which would be of great advantage in the study of geography. A course of evening study has been arranged, which I believe will be of particular advantage to advanced pupils. In institutions of this kind we have to always bear in mind that no course or line of work that is laid out for boys of normal development can be considered as fully adapted for our system of training. Many boys come to us delinquent morally and mentally, with bodies wrecked by vicious habits. These lads in the first place need systematic physical training, military drill, out door work and plenty of play. There can be no moral or mental development until physical strength has been acquired. All rules in this school must, therefore, be flexible. Each case we find has its own peculiar needs.

We have received from the agricultural department, based on market prices, crops amounting to $1,797.85; from the gardener vegetables amounting to $4,592.30; from the fruit department fruit amounting to $2,619.90, making a total of $9,010.05.

The tailoring department has made 757 uniform blouses, 757 uniform trousers, 3,043 pairs of overalls, 462 citizen coats, 462 citizen trousers, 462 vests, and 35 pairs white duck trousers. This department is in most excellent condition. We purchased and are now using an electrical cutting machine, which has facilitated the work wonderfully.

The sewing room has made all night shirts, toweling, jackets, and all bedding used in the institution.

The mending room, which is operated in connection with the laundry, has mended 51,672 pieces.

The shoe shop has repaired over 5,000 pairs of shoes, and made 2,312 new pairs.

The bakery has made all bread, pies and cakes used in the institution.

We have burned 850,000 brick, and have in kiln and on the yard approximately 1,000,000 brick. This is in addition to brick furnished for new cottage, hospital and dairy barn; also extension to Ohio and Highland dining rooms. Brick were burned at a cost of $1.10 per M.

The Inside Steward has charge of all departments connected with the culinary department. The several dining rooms for boys and officers are under his direct charge. He keeps an accurate account of all produce and supplies issued from it, and makes a daily report, showing the per capita cost for feeding every officer and boy in the institution. His monthly report shows the per capita cost for supplies in the way of brooms, brushes, soap, toweling, writing material, etc., issued to cottages. The main kitchen, which is under his supervision, is in direct charge of a man, who with five boys, does the cooking for an average

of 740 persons per meal. The Ohio and Highland kitchen is in direct charge of a woman, who with ten small boys, cooks for an average of 261 persons per meal. The boys' meals are composed of wholesome, well cooked food, and is varied from day to day. The Inside Steward has charge also of the canning department. This department has made a fairly good showing, but the equipment is wholly inadequate to properly care for fruit, vegetables, etc., that are raised on the farm. We need a permanent place for this work, with a better and more modern equipment.

The printing department is in most excellent condition. It employs quite a large number of boys, who are learning the printers' art. This department has furnished all blanks, stationery and reports required in the institution. The B. I. S. journal has been regularly issued and distributed to boys and officers of the school, mailed to parents and friends of boys, who have subscribed, and to institutions all over the country. Also to many other sources where a better knowledge of the methods and requirements of the institution would be a benefit.

The telegraph department is in fine shape. In fact, I consider this one of the best departments in the institution. In this department there are thirty-five boys receiving instruction. During the year twenty-one have finished their course, been paroled, and twenty of them are holding positions in railroad and commercial telegraph offices, at salaries ranging from $30.00 to $65.00 per month. Twelve boys, now receiving instruction, are capable of taking positions, and places will be ready for them as soon as they are eligible for parole. The department needs several new typewriters; also new equipment in the way of lines and instruments.

The electrical department has looked after the electric light plant, put in outside lines, wired new school building and hospital, and taken care of all electrical work. This department is also valuable to boys assigned to it.

The dairy deaprtment is in fairly good condition. Two years ago the legislature made an appropriation of $12,000 for a new dairy barn and dairy,—$7,000 of which was available in 1904 and the balance, $5,000 in 1905. Work has commenced on this building, foundation is in, and the brick work fairly under way. By early spring it should be ready for use. When completed, our herd of Holsteins should be increased to a sufficient number to furnish all milk necessary for the school.

We have maintained during the year a splendid band, composed of thirty-one boys, including a bugle corps of six. The orchestra is made up of band boys, and has furnished music for all entertainments and chapel services. The band has filled a number of engagements away from the institution with credit to themselves and to the school. They took part in the Knights Templars' parade in Columbus in October, and were present at the unveiling of the Sheridan monument at Somerset in November. They also played at the Lancaster Assembly in August,

besides playing a number of concerts in Lancaster. In no instance have I received a bad report for a boy connected with the band while absent from the institution. During the summer the band played concerts on Sunday evenings, which were much enjoyed by boys and officers.

During the year the military department has done good work. All boys physically able are required to drill two hours each week. Regimental inspection is held Sunday mornings, and during the summer dress parades on Sunday evenings. These parades attract a great many people from town and the surrounding country, and are one of the features of the institution. The drill in connection with work in the gymnasium develops a boy physically. Military discipline teaches him respect for authority, and gives him self-control. The value of this department in an institution of this kind, where it is necessary first of all to build up physical wrecks, as so many of the boys are when received, cannot be overestimated.

Through the traveling library system we are still receiving books from the state library. These books are distributed to the different cottages, and are enjoyed by the boys. There are a number of books in our own library, which can no longer be used for the reason that bindings are worn out. These books should be rebound, and we should have an appropriation for more books and for taking care of the ones we already have. A good library is of great value in an institution of this kind. From many friends throughout the state we have received magazines and papers, and these are distributed to the different cottages and are read and re-read until they are worn out.

Many people from all over the state, and in fact a great many from outside of the state, visit the institution, particularly during the summer months. The institution has been thrown open to the public, as we want them to feel that the school is theirs, and we are always willing to show them what we are trying to do. During the months of July, August and September over 6,000 people were shown through the school.

Considering the appropriations for the coming year, I figure that we will need practically the same for the regular funds as were made two years ago. The population is increasing, and we will need at least one new cottage. The Miami Cottage, which is the oldest on the grounds, should be replaced by another and more modern building. The walls of this building are badly cracked, the basement is very low, and it is far from being a safe home for sixty or seventy boys.

We should also have a detention cottage and place where boys could be detained and looked after for fourteen days or more after they are received. This cottage would safeguard us against the danger of contagious or infectious diseases. With a population as large as we have, we cannot take too many precautions. Most of the large institutions similar to this have detention cottages. In this connection I want to draw your attention to an opinion rendered, I believe, by the Attorney

General's department to the effect that the payment of fees for medical examination of boys committed here by probate or juvenile courts is illegal. I think the legislature should be asked to pass a law, requiring these examinations, and authorizing the payment by probate courts to the physician for making said examinations, and thus require a medical certificate sent with all commitment papers. A transcript of the proceedings should be also required by law. Simply sending a boy on warrant does not give the superintendent any information as to how or why he was sent.

Action should be taken in regard to old main building. One wing of this building is being used for a store room, with second floor for tailor shop and sewing room. A few workmen, contractors' help, are occupying rooms in the main part of the building. We are using several rooms for storage. This building has been condemned by a legislative committee, and reported against by architects and engineers. I would respectfully recommend that it be torn down entirely and this part of the grounds graded and made a part of the park, or, the rear wings, which seem to be the unsafe part, be torn out, and the front part brought down to two stories, and then remodeled into an office and library building. It would in many ways be an advantage to have all the officers, including the superintendent, steward's and general offices in this building. It would have many advantages from an administrative standpoint. The first floor of this building could be easily made into offices well adapted for our purposes. The time is coming when the chapel will have to be enlarged by removing the partition between the chapel proper and library. The second floor of the old main building would make a most excellent library room.

We are in need of a new store room. This building could be constructed near the kitchen with ample room, not only for store room, but with proper storage for vegetables, fruit, etc. This building could be constructed out of stone and brick, which could be furnished by the institution, and a large part of the labor performed with our own help, and it would require but a small appropriation, and that for roofing and lumber.

At the central steam plant we should have another battery of boilers. I believe it would be a good proposition to consider the water tube boilers. With the kind of water we have here water tube boilers would undoubtedly be economical and a great saving in fuel.

For ordinary repairs and improvements we need practically the same amount as was appropriated two years ago. There are many fences to be rebuilt; the avenue from Administration Cottage should be extended and the roadway improved by macadam or paving. The streets from McKinley Avenue to new school building should be paved; the road now passing by old hospital to dairy barn should be paved to dairy barn. The old hospital building, which will soon be vacated, with very little

expense could be remodeled into an industrial building. We could use the first floor for the telegraph department and the second floor for the tailoring shop.

In conclusion, I want to express my appreciation of the valuable assistance rendered by George A. Stirling, assistant superintendent, Capt. W. H. Hilles, steward, and all other officers and employes for their efficient service.

Thanking you, gentlemen of the Board of Trustees, for your kind assistance, and with high personal regards, I am,

Very respectfully,

C. B. ADAMS,
Superintendent.

ARCHITECTS' REPORT.

C. B. Adams, *Superintendent:*

Dear Sir: — We beg to submit herewith our annual report as architects:

The School Building, for which the contract was let in 1904, was completed during the early part of the year and the building is now in use.

During this year the contracts have been let for the Hospital, for the new Boys' Cottage and for the brick work of the Dairy Barn. In addition to this there has been a large amount of work done on the grounds, in the extension of walks, drives, etc., to reach the various new buildings, and tunnels have been extended to reach the School Building and new Cottage, and steam lines have been installed therein for heating the buildings referred to.

The work on the Hospital Building is well toward completion and this will be ready for occupancy before the first of January.

The Boys' Cottage is up to a point where it is ready to receive the slate roof; the brick work and a large portion of the wood work are completed. This building will probably be ready for use early in April.

On the Dairy Barn the foundation is completed. The brick work is about one-half completed.

In addition to the above work, we prepared plans for remodeling the Dining Room near the Ohio Cottage, adding about one-third more floor space to this room and the work on this remodeling has progressed to the point of enclosing the building. Nearly all the work in connection with the remodeling of this Dining Room has been done by the Institution carpenter and the boys working under him.

It might be of interest to add here that all of the stone work, cement work and a large portion of the painting, glazing and electric wiring in connection with all of the new buildings on the grounds during the past year has been done by the labor in the Institution, and the work as executed, is of the very highest character, and considerable money has been saved to the State by this method of construction. All of the brick used in the new buildings, except the glazed brick for interior wainscotings, were manufactured by the boys, and we wish to commend the grade of materials being turned out by them in this line.

The new buildings constructed within the last year and those now under construction and contemplated for the next year, will, of course, necessitate extensions of the steam and electric lines, and on account of this we would recommend the installation of an additional battery of

boilers. While there is boiler capacity enough in the power house to do the work when every boiler is in use, we feel that you should have sufficient equipment in this line to insure you against trouble in case of a break-down in any part of the plant, and in order to do this, it will be necessary to keep at least one battery of boilers idle all the time.

It is, of course, desirable that you should be able to obtain the greatest efficiency in your plant and at the same time economize in the use of fuel, and for this reason we recommend that you install a battery of two water tube boilers, having 250 H. P. in each boiler, or 500 H. P. to the battery, and in the following estimate for extensions of the steam plant we have provided for the installation of boilers of this character.

We also included in the following estimate a sufficient amount for extensions of the steam lines in the tunnels to reach contemplated new buildings.

Regarding the various buildings and improvements, for which appropriations are desired during the next session of the legislature, our estimates are as follows:

One cottage for boys	$20,000 00
One detention cottage	25,000 00
One battery of water tube boilers, 500 H. P.	6,000 00
Additional steam piping, electric lines on the grounds, tunnel extensions, etc.	3,000 00

Respectfully submitted,

RICHARDS, MCCARTY & BULFORD.

PHYSICIANS' REPORT.

C. B. Adams, *Superintendent:*

Dear Sir: — We have the honor to submit our annual report of medical department of your institution.

The year, in the main, has been comparatively healthy. The only epidemic of any character has been porrigo, of which we had about one hundred and fifty cases, most of which are now fully recovered.

There has been but one death during the year, resulting from pneumonia.

The usual number of cases of minor surgery incident to the congregation of one thousand boys in a body, has resulted as usual, but there were no fatalities or permanent injury resulting.

Miss Henderson has proved a very efficient Matron,— faithful, obliging and uniformly kind.

We wish in conclusion to thank the Board and Superintendent for their uniform kind and courteous treatment.

Respectfully submitted,

Drs. Goss & Goss,
Physicians.

SUPERINTENDENT OF SCHOOLS.

C. B. ADAMS, *Superintendent:*

DEAR SIR:—I have the honor to herewith submit my report for the year ending November 15, 1905.

This has been a prosperous year with the school department. Excepting the fifth grades, all have been in continuous session, barring a brief rest of one or two weeks respectively by the other grades during the busy season of outdoor occupation.

The fifth grade, with a number of large boys from the other grades, were withdrawn from school April 1st, and have remained in force up to the present. Thirteen half-day schools and four all-day schools were maintained during the winter months. Since April 1st, only eleven of the former and three of the latter, with a monthly enrollment of six hundred and fifty have been in.

Eighteen different teachers, nine men and nine women were employed within the year. Only five taught the whole year and three during the summer vacation.

During the year two hundred and twelve boys were assigned to the first grades. Fifty-six were wholly illiterate, thirty-two of whom were of the truant class, averaging ten and one-half years of age, and twenty-four averaging fourteen and one-half years of age were committed to the institution for some graver offense. Seventy-eight other boys of this number were able to take up the second reader, but were without any knowledge of the fundamental rules of arithmetic. Seventy-eight others, able to read the third reader, add and subtract, were unable to divide at all, or multiply with any degree of certainty.

Twelve half-day schools were transferred to the new school building October 31st. The conveniences and advantages are proving even greater than were anticipated. Many former problems of discipline have vanished. The teacher has surveillance of his pupils in the halls during recess and the janitor in the toilet room, so that at all times the pupils are in the presence of a teacher or officer. The school rooms are cheerful and convenient, and the proximity of the principal's office has a wholesome influence. Only one room is now occupied all day, leaving five vacant each half day.

Owing to the excessive number of force boys in the afternoon and the crowded condition of the afternoon schools, I recommend another afternoon school. This would also adjust the present unbalanced condition of the morning and afternoon forces.

I recommend an evening study hour, especially for advanced pupils. During the winter months it would be well to make the first and second grades all-day schools. There should be no time lost by loafing.

I beg to call attention to the disadvantages suffered by many boys, who by their peculiar tasks, are debarred from school privileges equal to those enjoyed by their peers. I suggest in such cases a limited period of service be required, distributing the burdens as well as the privileges. It is recognized that such a plan may afford less dexterity and skill in the vocations affected, yet it seems unfair to the boy to sacrifice his precious time.

The new text books in geography and arithmetic are well received by teachers and pupils, and the new academic dictionaries placed in the school rooms make a handy pupils' reference, and supplies a long felt need.

I also suggest that suitable wall maps be purchased as aids in the study of geography.

In conclusion, I wish to express my appreciation of the cheerful and faithful service of teachers and officers and to thank you for many courtesies and kind approval.

Respectfully,

H. V. MERRICK.

HOSPITAL REPORT.

C. B. ADAMS, *Superintendent:*

DEAR SIR: — I have the honor to submit my report for the year ending November 15, 1905.

During the year there have been 2.172 boys treated. Of that number 327 were admitted to the hospital, and by families as follows:

Ohio	47	Cuyahoga	21
Highland	37	Scioto	26
Bushnell	29	Nash	20
Lagonda	23	Miami	27
Hocking	26	Union	18
Muskingum	28	Maumee	25

The following number of diseases have been treated, aside from many minor troubles:

Tonsilitis	37	Broken and fractured bones	13
Rheumatism	10	Appendicitis	4
Sikn disease	54	Stomach trouble	28
Fever	15	Heart trouble	5
Pneumonia	4	Rupture	10

One death occurred during the year, John Robinson, Union Family, on February 4, 1905, with pneumonia.

Thanking you for many favors, I am,

Very respectfully,

MISS M. HENDERSON.

MILITARY DEPARTMENT.

Col. C. B. Adams, *Superintendent:*

Dear Sir: — I have the honor to submit this report for the year ending November 15, 1905.

The organization of the department remains as shown in recent annual reports. For military instruction and drill, and for the convenience of movement about the School, cadets are formed in twelve companies, again in three battalions, and finally in a regiment. The average strength of a company at this date is sixty cadets.

All cadets are taught everything embraced by the United States Infantry Drill Regulations as modified for the army in 1904. Special attention is given to setting up exercises, and the drilling of "Butts' Manual," for these are especially adapted for the physical improvement of the boys. The improvement in personal physique, resulting from this systematic exercise is general, and in the case of everyone who really exerts himself, is marked. Many of the boys have as fine figures as could be found in the army, and these are always the ones who will be seen doing their exercises with energy and precision, as though they really enjoyed them.

It develops the attention as well as the muscles. Perfunctory movements cannot be tolerated. In the manual of arms one is required not only to perform a certain muscular act, but to do it at the same time, and conform to the inch in final position with from 60 to 600 others. The hesitation of one cadet would result in delay and inconvenience to all. Disobedience in rank, therefore, becomes unpopular, and the habit of obedience is formed and strengthened by the daily and hourly repetition suggested by the very word "drill."

The drill is planned not so much to perfect the cadets in exhibition movements as to develop in them the qualities which mark good soldiers in active service; obedience, order and faithfulness in the performance of duty.

Saturday, in the School, as it is at any army post, is devoted to an all-around cleaning up for Inspection Sunday morning. These weekly competitions arouse the ambition of the different companies. The company receiving the most special mentions for inspection during the year is awarded the Converse medal, the same to be worn by the captain of this company at parade and inspection until the next annual Military Day, which is held in October, and which is looked forward to by all cadets.

Every Sunday afternoon at four o'clock, regimental drill, parade and review are held, followed by drilling the four sets of the Butts Manual by the music, the music being furnished by the cadet band. Spectators are cordially invited.

On July 4th the regiment took part in the parade in Lancaster, and gave a successful exhibition drill at the Ball Park. This drill and the march to and from the park were marked by thorough soldierliness of everyone in ranks, so another year has been added to the already good record of the regiment for honorable conduct outside the School limits. Considering the temptation which must come to many of the boys at such times, a march of this kind with nothing to mar the homecoming should reflect as much honor upon the colors carried by them, as would a well fought battle by a regiment in the service, and I think the boys feel it so, and govern themselves accordingly.

During the year there has been advancement in nearly every branch of the work we are trying to do. Good natured relations between officers and cadets have been the rule, and this friendliness has given opportunity for greater attention to the details of military instruction, with a resulting improvement from the purely military standpoint.

Respectfully submitted,

G. M. Beckett,
Military Instructor.

CULINARY DEPARTMENT.

COL. C. B. ADAMS, *Superintendent:*

I herewith submit my report for the fiscal year ending November 15, 1905.

An accurate account of all provisions and supplies, issued from day to day, has been kept, and the cost per capita for feeding every employe and inmate in the institution reported to the Superintendent every day.

The kitchen, in charge of Mr. Ed. Rose, with the assistance of five boys, has done all the cooking for an average of 650 boys and 90 officers and employes, or 740 persons per meal. The boys' meals are composed of wholesome, well cooked food, varied from day to day. The meats, comprising beef, mutton, pork, smoked shoulder, bologna, head cheese, and sausages, all the vegetables in season such as potatoes, string beans, wax beans, green beans, corn, cabbage, spinach, lettuce, onions, sweet potatoes, celery, lima beans, cucumbers, beets, navy beans, together with watermelons, muskmelons, grapes, apples, rhubarb, raspberries, strawberries, and blackberries,— all fresh from our own garden and raised by the boys. In addition, they receive cakes, buns, bread and butter, coffee, tea and milk. On special occasions the boys are given chicken, turkey, eggs, oranges, bananas, pop corn, ice cream, peanuts, lemonade. Jam, pickles and kraut have been put up for the winter in the cannery department, a report of which will be found below.

The kitchen for the Ohio and Highland boys is in charge of Mrs. Ford, who with the assistance of Mrs. Rees and 10 boys, has done all the cooking for 250 boys and 11 officers, a total of 261 per meal. They in addition have charge of the Cannery Department. This department has made a fairly good showing considering the equipment of the factory being very inadequate. I therefore recommend a permanent place to do the canning with modern equipments.

The following is a list of the fruits and vegetables preserved for winter use (after the boys have been plentifully supplied):

Raspberry jam	1,373	gallons.
Pickles for boys	28,000	"
Vinegar	350	"
Tomatoes	800	"
Green tomatoes pickled	200	"
Kraut	840	"
String beans	60	"
Tomato catsup	30	"
Spiced pears	27	"

Grapes for pie	48 gallons.
Apples	71 "
Plums	10 "
Pickled cauliflower	26 "
Raspberry preserves	6 "
Strawberry	38 "
Currant Jelly	46 "
Raspberry	107 "
Blackberry	25 "
Blackberry jam	6 "
Apple jelly	50 "
Grape butter	40 "
Chili sauce	30½ "
Grape jelly	4 "

The meat department is in charge of Mr. Harry Reed, who with the assistance of 5 boys has done all the slaughtering of cattle, attended to all cutting and delivering of meats to the kitchen, made all soft soap for laundry and tallow from grease, and cured and smoked the following meats:

Ham	3,430 Lbs.
Shoulder	1,376 "
Cured beef	1,400 "
Smoked beef tongues	427 "
Bacon	2,742 "
Dried beef	305 "
Wieners	210 "
Pork sausages	497 "
Wurst pudding	1,230 "
Lard	9,000 "
Boneless pigsfeet	70 "
Lamb	427 "

The new modern slaughter house built this year greatly enabled Mr. Reed to school his boys in the practical art of butchering. They having dressed this year:

Head beef steers	237	Dressed weight	136,745 Lbs.
Head calves	40	Dressed weight	4,000 "
Sheep and lamb	99	Dressed weight	4,474 "
Hogs	252	Dressed weight	42,679 "
Turkeys	35		
Chickens	1,000		

We are greatly in need of a new store. The present building is very unsatisfactory in its present shape; a new one should be built or the old one remodeled. We should also have a building for the storage of fruits and vegetables.

The officers' and boys' dining room on the main side, seating 90 officers and 650 boys respectively, in charge of Mr. and Mrs. Geer, are well equipped with table linen, knives and forks, queensware, etc.,

all being accounted for and in good condition; likewise the Ohio and Highland dining rooms, accommodating 11 officers and 250 boys under the supervision of Mrs. Swartz.

The Paring Room, the distributing point for nearly all the vegetables and fruits raised during the summer season, is one of the busiest places on the farm. It is here the produce is prepared for immediate use or sent to the canning department. The new floor laid this spring is a great improvement.

Mrs. Litkenhouse has charge of the milk and butter storage, which is in excellent condition. I am pleased to say that not only has the daily per capita system been a great help to the officials of the institution, but it has greatly enabled us to tell almost to a day the length of time any provisions or supplies on hand would last, thereby avoiding many emergency requisitions, as is often the case where no special record is made of the quantities issued that can be followed from day to day.

Thanking yourself and others in authority for the kind assistance given me during the year, I am,

Very respectfully,

GEORGE A. COOK,
Inside Steward.

TELEGRAPHY DEPARTMENT.

C. B. Adams, *Superintendent:*

Dear Sir: — I have the honor to herewith submit my report of this department, showing the work accomplished during the year ending November 15, 1905.

Seventeen boys are in the morning class, eight boys in the afternoon class and five boys in the office all day,— making the enrollment thirty. They have been in the department from four weeks to one year.

There have been dismissed on account of bad behavior, five boys. Twenty-one boys having finished their course, have been paroled from the institution,— twenty of whom are holding responsible positions in both railroad and commercial telegraph offices, at salaries ranging from thirty to sixty-five dollars per month. Twelve of the boys now enrolled are capable of holding first class telegraph positions, which have been promised them when paroled; eight more will be ready in two months, and the entire class is doing exceedingly well.

The main line sends and receives thirty-six words per minute, and the average number of words handled by the entire class is over 4,000 per capita, each half day.

The fact that all the boys secured a position within a week after leaving the institution, speaks for the thoroughness of their preparation here. They are instructed in the work of a strictly first class, up to date, telegraph office. Everything to encourage the department has been quickly attended to, all needs promptly supplied, and the office is in excellent working condition.

We have on hand, and in use, twenty-one 4-ohm sounders, twenty-eight keys, three 20-ohm relays, seven resonators, three Remington typewriters, two Underwood typewriters, one 3 strap Western Union switchboard with lightning arrester, and eight rods covered copper wire.

Respectfully,

Ira D. Pyle.

FLORIST'S AND GARDENER'S REPORT.

C. B. Adams, *Superintendent:*

Dear Sir: — I have the honor to herewith submit the following report for the year ending November 15, 1905.

In the greenhouses from 10 to 12 boys are employed daily, who receive sufficient training here to accept positions with florists, when leaving the institution. A large stock of tropical, bedding and plants for the raising of cutflowers, furnishes enough material for the instruction of beginners. In flower beds 25,000 plants and buds were set out. The green houses supply dining room, hospital, chapel, school rooms, cottages, etc., with a good grade of cut flowers and potted plants.

In the gardens 20 to 25 are employed regularly. The season has again been very prosperous. Vegetables of good quantity and quality have been furnished to kitchens daily, and a large supply is on hand for use until spring.

New lawns were made and sown with 500 pounds of lawn seed; 100 trees and shrubs have been planted; a top dressing of 3 tons of fertilizer was applied to all lawns.

Following is an exact amount of vegetables raised during the season, with the prices taken from wholesale market reports:

Cabbage, 280 bbls., valued at	$289 05
Turnips, 100 bbls., valued at	150 00
Kale, 26 bbls., valued at	39 00
Spinach, 32 bbls., valued at	51 50
Beets, 60 bbls., valued at	90 00
Parsnips, 27 bbls., valued at	36 50
Sweet potatoes, 16 bbls., valued at	39 00
Lettuce, 232 bushels, valued at	140 80
Tomatoes, 675 bushels, valued at	446 40
Green tomatoes, 70 bushels, valued at	35 00
Carrots, 7 bushels, valued at	4 50
Kohlrabe, 15 bushels, valued at	30 00
Peas, 101 bushels, valued at	77 55
String beans, 328 bushels, valued at	170 05
Onions, 60 bushels, valued at	32 50
Celery, 7,575 bunches, valued at	263 70
Rhubarb, 2,250 bunches, valued at	122 00
Radishes, 14,330 bunches, valued at	115 50
Onions, 11,610 bunches, valued at	108 10
Asparagus, 12,025 bunches, valued at	120 25
Lima beans, 710 quarts, valued at	88 50
Mangoes, 200 dozen, valued at	20 00

Cucumbers, 1,100 dozen, valued at	$147 25
Cauliflower, 100 dozen, valued at	106 25
Corn, sugar, 367 dozen, valued at	33 85
Eggplant, 30 dozen, valued at	30 00
Horseradish, 60 lbs., valued at	3 00
Dried sage	5 00
Winter radishes, 1,500, valued at	7 50
Red peppers	10 00
Soup vegetables, valued at	15 50
Leek, 1,565, valued at	15 65
Pickles, 43,800, valued at	67 65
Cantaloupes, 8,705, valued at	436 60
Watermelons, 750, valued at	82 75

VEGETABLES ON HAND.

Parsnips, 25 bbls., valued at	$50 00
Turnips, 150 bbls., valued at	225 00
Spinach, 10 bbls., valued at	15 00
Beets, 15 bbls., valued at	22 50
Sweet potatoes, 25 bbls., valued at	62 50
Carrots, 25 bushels, valued at	12 50
Onions, 200 bushels, valued at	150 00
Horseradish, 200 lbs., valued at	10 00
Celery, 16,000 bunches, valued at	480 00
Cabbage, 4,000, value	120 00
Leek, 1,000, value	10 00
Sales of vegetables	3 90

Approximate cost of operating greenhouses, gardens and lawns is $2,468.87.

Thanking you for many favors shown, I am,

Respectfully,

R. S. STARKE.

PRINTING DEPARTMENT.

C. B. Adams, *Superintendent:*

Dear Sir: — I have the honor to herewith submit my report for the year ending November 15, 1905.

During the past twelve months this department with an average of twenty-one boys, has furnished all the necessary blanks, stationery, and printed matter of every character required of it for the institution, such as letter heads, envelopes, programs, monthly, weekly and daily report blanks, tablets for schools, and hundreds of other blank forms required in a public institution.

The "Boys' Industrial School Journal" has been regularly issued and distributed to the boys and officers of the school, and mailed to parents and friends of boys, who have subscribed, and to other institutions all over the country in exchange for similar publications. Also to many other sources, where a better knowledge of the methods and requirements of the institution would be a benefit. Many words of commendation and praise have been received, which lead me to believe that our School paper has been appreciated by the many who have received it.

But the great and most important object of the printing department, and the one that should always be kept in view, is the opportunity it affords to a number of boys to learn a useful trade. The printing office is equipped with a first-class printing outfit, and during the past year forty boys have been members of the class in printing, and have been assisted and instructed in their work with various degrees of success. I am proud to say that a number of the boys who have returned to their homes have, through instruction here received, been able to secure positions in printing offices, and are doing well. While the term here is not long enough to acquire the knowledge of a journeyman printer, they go out with experience, that makes them valuable apprentices, who can finish their trade and command the wages of skilled labor by the time they reach manhood.

The cost of operating this department for the year is estimated as follows:

Value of "School Journals" printed	$936 00
Estimated value of job printing	700 00
Total	$1,636 00

Cost of paper stock used	$405 38
Cost of printing material, repairs, etc	153 87
Salary, including board, etc	912 00
Total	$1,471 25

The only recommendation I have to make is that the department be given the same loyal assistance and support during the coming year that it has had in the past, and I assure you that it will repay many times over the expense of operating it.

Respectfully,

RALPH E. EMBREY,
Instructor in Printing.

DAIRY DEPARTMENT.

Col. C. B. Adams, *Superintendent:*

Dear Sir: — I have the honor to herewith submit my report for the year ending November 15, 1905.

As a new, up to date, dairy-barn is under construction, and which will be finished in the near future, a great deal better results will be obtained from this department. About 80 head of stock can be comfortably stalled in the new barn, and, with that ample number a supply of milk and cream can be furnished to the institution at all times of the year.

I am assisted by six boys, and we have been busy every day. We have built and repaired fences all over the farm.

I recommend, when increasing the present herd, to purchase Holstein Friesian cattle. It is becoming widely recognized that the milk from the large and vigorous race of cattle, especially Holsteins, possesses great quality. During the St. Louis dairy demonstration the Holstein Friesian herd won twenty per cent. more money than any other herd. It would appear from the greatly increased demand of Holsteins in the west that the demonstration convinced a large number of people that the Holstein is the most profitable cow.

LIVE STOCK ON HAND.

22 Holstein cows, valued at	$75 00	$1,650 00
9 graded cows, valued at	40 00	360 00
4 heifers, valued at	35 00	140 00
4 calves, valued at	7 00	28 00
1 bull, valued at	125 00	125 00
1 bull, valued at	40 00	40 00
Total		$2,343 00

Stock turned over to butcher	$1,459 85
Approximate cost of operating department	2,135 54

Gallons of milk produced, 23,645.

Respectfully submitted,

H. Wehrs.

BRICKYARD.

COL. C. B. ADAMS, *Superintendent:*

I herewith submit my third annual Brickyard report for the year ending November 15, 1905.

Owing to the wet season, we were only able to make 850,000 brick.

Cost of operating plant, including wages paid setters, salary and board for self, and wood purchased for burning, $809.00.

Brick on yard 1,000.000.

Thanking you for past favors,

Very respectfully,

G. T. DOLBY.

BAKERY.

C. B. ADAMS, *Superintendent:*

DEAR SIR: — I have the honor to herewith submit the following report for the year ending November 15, 1905.

Bread (loaves)	130,396
Buns	57,388
Pies	8,447
Cookies and small cakes	99,587
Cake (pounds)	1,590
Gingerbread (pounds)	4,914

MATERIALS CONSUMED.

Flour	1,571 barrels.
Flour (graham)	1½ "
Salt	3,600 pounds.
Sugar	8,487 "
Lard	5,773 "
Butter	866 "
Yeast	565 "
Soda	131 "
Cream of tartar	46 "
Corn starch	27 "
Cocoanut	10 "
Chocolate	5 "
Raisins	22 "
Currants	17 "
Spices	69 "
Extracts	11 "
Oatmeal	13 "
Molasses	181 gallons.
Eggs	1,051 dozen.
Lemons	2½ "
Oranges	1 "
Bananas	1 "
Nutmegs	2 "
Approximate cost	$9,765 00

In addition to above amounts, 94 barrels of flour have been issued to kitchens.

Nine boys have been employed.

Very respectfully,

EMMA M. POOL.

SHOE SHOP.

C. B. ADAMS, *Superintendent:*

DEAR SIR: — I have the honor to herewith submit my report for the year ending November 15, 1905.

Value of material and finding received	$2,744 72
Value of leather and finding on hand	175 00
Value of tools and machinery	30 00
New shoes made (pairs)	2,312
Shoes repaired	5,609
New shoes issued	2,052
New shoes on hand	260

Very respectfully,

CHRISTIAN PAULAKUHN.

CARPENTER SHOP.

C. B. Adams, *Superintendent:*

Dear Sir: — I have the honor to herewith submit my report for the year ending November 15, 1905.

I will endeavor to give below an estimated value of repair work done on different cottages; also work done for the different departments. We have done all the work on the new slaughter house, built new smoke houses, and have done all the work on the Ohio kitchen.

With two assistants and four boys, all work has been done promptly, and in the best manner possible.

The repairs to the different cottages were new locks, new floors, repairing verandas, steps, windows and doors, of which space will not permit an itemized list. This department turned 227 ball bats made of white ash, each family receiving eight, and each department two. These were made at an estimated cost of $29.21.

Have put in handles for the different forces, such as pick, hoe, axe, rake and mattock handles; also repaired wheelbarrows for same, estimated value $155.95. Repairs to the long flight of steps to the station, $38.75.

The following is an approximate cost of material and labor performed in making repairs to the family cottages:

Maumee Cottage	$37 50
Union Cottage	39 55
Miami Cottage	55 25
Nash Cottage	115 10
Scioto Cottage	116 75
Muskingum Cottage	207 00
Hocking Cottage	176 00
Bushnell Cottage	17 75
Highland Cottage	16 50
Ohio Cottage	33 45

The following is an approximate cost of material and labor performed in making repairs to departments:

Electric light plant	$175 00
Horse barn	259 45
Dairy	9 75
Laundry	64 00
Printing office	21 25
Tailor shop	32 75
Conservatory	137 25
Gardeners	181 55

Chapel	$19 75
Employes' Building	183 85
Brick plant	73 75
Main kitchen	11 45
Main serving room	16 30
Boys' dining room	19 50
Ohio dining room	109 95
Ohio kitchen	17 15
Bakery	40 65
Hospital	13 75
Telegraph office	67 50
Canning department	40 90
Paint shop	42 50
Tin shop	16 25
Armory and bath rooms	14 25

The following is an approximate cost of material and labor performed in making improvements to new buildings:

Slaughter house	$823 75
Smoke house	25 00
Ohio kitchen	375 00
New school building	86 25
Store room	49 50
One derrick for masons	50 00

I would respectfully urge the purchase of a new planer. We are badly in need of a building for the storage of lumber.

I have been working four boys daily since my engagement here — five and one-half years. It has been a pleasure to me to know that there have been four boys released and gone home with a ten dollar gold piece in their pockets, thus denoting perfect conduct.

With sincere appreciation of the many courtesies extended, I am,

Very respectfully,

WM. F. LITTEN.

TAILOR SHOP.

C. B. ADAMS, *Superintendent:*

DEAR SIR: — I have the honor to herewith submit my report for the year ending November 15, 1905.

GARMENTS MADE.

Uniform coats	757
Uniform trousers	757
Citizens' coats	462
Citizens' trousers	462
Citizens' vests	462
Overalls	3,043
White duck trousers	35

CLOTHING ON HAND.

Uniform coats	115
Uniform trousers	230
Citizens' coats	36
Citizens' trousers	36
Citizens' vests	36

We have in use seven sewing machines and one cutting machine. Would respectfully recommend motor power to run sewing machines.

The cost of operating this department, including material and salary, $5,802.66.

Respectfully submitted,

F. J. KUBU.

TINSHOP.

COL. C. B. ADAMS, *Superintendent:*

DEAR SIR: — I have the honor to herewith submit my report for the year ending November 15, 1905.

Cost of material purchased	$1,265 75
Cost of material on hand	324 14
Estimated cost of work accomplished	2,238 65

With the assistance of three boys, repairs have been made to the following buildings: Scioto, Muskingum, Hocking, Highland, Ohio, and Administration Cottages, Jennings Hall, Dining Hall, Boiler House, Pumping Station, Laundry, Old Hospital, and Plumbing Shop, in addition to all general repair work.

New tin roof has been put on Muskingum Cottage, slate roof on new Slaughter House, galvanized iron spouting on slaughter house. We did all galvanized iron and slate work at new hospital, and made and put in all hot air and ventilation pipes in same.

At the shop we made the following:

21 doz. galvanized iron buckets,
25 doz. 2-gallon fruit cans,
2 doz. 10-gallon lard cans, and all other tinware used.

With sincere appreciation for the many courtesies extended, I am

Very respectfully,

A. J. LYLE.

FARMING DEPARTMENT.

C. B. Adams, *Superintendent:*

Dear Sir: — The following is the amount of produce yielded during the year ending November 15, 1905:

Potatoes, 1,631 bushels, at	$0 60	$987 60
Sweet corn, 2,980 doz., at	10	298 00
Millet hay, 3 tons, at	6 00	18 00
Corn, 50 bushels, at	40	20 00
Fodder, 520 shocks, at	10	52 00
Mangel wurzel, 1¼ tons, at	5 00	6 25
Beans, 130 bushels, at	2 50	425 00
Total		$1,797 85

Have sown 25 acres of rye, and 15 acres of clover.

Respectfully,

W. N. Hedges.

FRUIT DEPARTMENT.

C. B. ADAMS, *Superintendent:*

DEAR SIR: — I have the honor to herewith submit my report for the year ending November 15, 1905.

The approximate average of fruit is as follows:

Apples	45 acres.
Peaches	10 "
Vineyard	25 "
Cherries	2 "
Plums	1 "
Pears	3 "

The following fruit was gathered during the season:

Grapes, 8,180 lbs., valued at	$244 90
Apples, 764 bushels, valued at	640 60
Cider, 4 bbls. for vinegar	16 00
Pears, 16 bushels, valued at	24 00
Plums, 3 bushels, valued at	6 00
Crab-apples, 10 bushels, valued at	20 00
Total	$951 50

Respectfully submitted,

SETH MOWERY.

SMALL FRUIT DEPARTMENT.

COL. C. B. ADAMS, *Superintendent:*

DEAR SIR: — I submit a brief report of the Small Fruit Department for the year ending November 15, 1905.

In the spring we set out 16,000 new strawberry plants, 2,000 blackberry and 1,500 raspberry plants.

The strawberry yield was not as good this year as last, owing to the destructive work of the grub worm and the extreme dry weather in the fall of 1904. The blackberry and raspberry crops, however, were unusually large.

¾ acre of strawberries yielded 2,218 quarts, valued at.....	$298 00
3½ acres of raspberries yielded 12,804 quarts, valued at.....	1,280 40
1½ acres of blackberries yielded 1,187 quarts, valued at.....	118 70
⅓ acre of currant yielded 475 quarts, valued at	47 50
Total	$1,668 40

Thanking you for prompt support in this department and courtesies extended, I am,

Respectfully,

D. V. BAY.

ELECTRIC LIGHT PLANT.

C. B. ADAMS, *Superintendent:*

DEAR SIR: — I herewith submit my report for the year ending November 15, 1905.

Besides the work necessary to properly maintain a plant, I have given the outside lines a thorough overhauling, and renewed about half with new cross arms, built new line to the slaughter house, cutting all poles for same, for which it took 2,860 feet of No. 6 wire. All poles were painted, consuming about 40 gallons of paint. Connected motor in Nash Cottage, wired the new school building, new hospital, re-wired school room at Muskingum Cottage, all of which cost, approximately, $700.00.

Two motors are in use, and they are giving satisfaction. Have about 31 arc lights and about 2,000 incandescents. Would respectfully recommend the purchase of new arc lights, as repairs to the old ones in a year's time would almost pay for new ones.

Approximate cost of operating department, $1,115.00.

Respectfully submitted,

C. G. KLINK,
Electrician.

PAINT SHOP.

C. B. Adams, *Superintendent:*

Dear Sir: — I herewith submit my report for the year ending November 15, 1905.

The past year has been a very busy one for this department, owing to the new buildings constructed and under construction, and the extensive repairs made to old ones. With the assistance of Mr. Van Denton and eight boys, the following cottages have been painted inside and outside: Highland, Bushnell, Lagonda, Hocking, Muskingum, and Ohio kitchen. Cuyahoga, Scioto, Miami cottages and drill hall have been painted outside, and the stand pipe inside and outside. Have hung paper and finished floors in Nash Cottage, painted inside of kitchen and serving room, varnished the whole interior of boys' dining room, frescoed officers' dining room, painted outside of power house and electric plant, slaughter house and plumbing shop. Have put in over 1,000 panes of glass, finished 3,000 feet of moulding for officers' building, finished teachers' desks for school building, painted chairs, stands, tables, benches, etc., besides all general repair work, and the glazing, outside painting and inside finishing of new school building.

Several boys have been paroled from the department, from all of whom we are receiving encouraging reports.

Stock purchased during the year	$1,425 59
Stock issued to other departments	324 00
Work accomplished during the year	4,592 50
Value of stock on hand	329 69
Cost of operating department, including salaries, board and material	2,140 53

With many thanks to yourself, Mr. Stirling and Mr. Hilles, I beg to remain,

Yours respectfully,

John W. Byron.

BOILER HOUSE AND ICE PLANT.

COL. C. B. ADAMS, *Superintendent:*

DEAR SIR: — I have the honor to submit a report of my departments for the year ending November 15, 1905.

Cost of improvements made on boiler house	$1,398 50
Cost of supplies received	613 08
Cost of supplies disbursed	348 24
Cost of supplies and tools on hand	300 00
Cost of coal consumed, 80 T. at $1.80	144 00
Cost of gas consumed, 167,500,000 cu. ft. at 10c per M. cu. ft.	16,750 00
Cost of improvements, repairs and supplies to ice plant	172 00
Value of machinery in both departments	21,660 00

One ton of ice is manufactured each day, and five cold storage rooms are in good condition.

Very respectfully,

WILLIAM BURKE, *Engineer,*
JOSHUA WHITELY, *Asst. Engineer.*

BLACKSMITH SHOP.

C. B. Adams, *Superintendent:*

Dear Sir: — I have the honor to herewith submit my report for the year ending November 15, 1905.

With the assistance of two boys, I have kept all horses and mules shod, and have done work of all kinds, such as wood work on wagons, making new wheels, new spokes, new handles; hoes, shovels, spades, and rakes. Have furnished iron and bolts for the plumbers, and for all departments.

Work accomplished amounts to	$1,620 00
Value of tools	200 00

MATERIAL ON HAND.

Iron	3,000 pounds.
Horse shoes	500 "
Nails	75 "

Respectfully submitted,

John McMillen.

PUMPING STATION.

C. B. ADAMS, *Superintendent:*

DEAR SIR: — I have the honor to submit the following report for the year ending November 15, 1905.

Approximate cost of operating department, including fuel, repairs, supplies, etc.	$2,576 23
Gallons of water pumped	35,274 902
Approximate cost of supplies on hand	$108 50

Respectfully submitted,

D. L. TERRY.

LAUNDRY.

C. B. ADAMS, *Superintendent:*

DEAR SIR: — I have the honor to herewith submit my report for the year ending November 15, 1905.

We have five (5) washers, two (2) extractors, two (2) starchers, one (1) mangle, one (1) shirt, collar and cuff ironer (combined), — all in good condition.

Number of pieces washed for —	
Officers	182,666
Boys	476,714
Total	659,380
Number of pieces ironed for —	
Officers	182,666
Boys	248,874
Total	431,540

Our working force consists of thirty-nine boys, eighteen during the morning, and nineteen in the afternoon. During the year twenty-four have gone out, honorably discharged, two of whom have been returned. From many of the others encouraging reports come.

With sincere thanks for courtesies extended by yourself and Assistant Superintendent Stirling toward us, I am,

Respectfully yours,

M. E. ARCHAMBAULT.

MUSIC DEPARTMENT.

COL. C. B. ADAMS, *Superintendent:*

DEAR SIR: — I have the honor to herewith submit my report for the year ending November 15, 1905.

The past year has been a successful one, especially for the band, which, with the exception of ten boys, was the same as last year's, although a number of boys were transferred to different instruments. The band numbers thirty-one, including a bugle corps of six. The orchestra is made up of boys from the band, and furnishes music for all services and entertainments in chapel. The boys have applied themselves to their work, and each has been untiring in his efforts to perfect himself on his instrument and in the knowledge of music. The choir is fulfilling its duties in chapel services and on other occasions very commendably, numbering thirty-two. Rehearsals and study are held three and four evenings each week.

The band has filled a number of engagements away from the institution, and, by their conduct and playing have met with highest praise and appreciation from the public and the press. I feel that these trips have greatly benefited the boys, encouraging them in their efforts to do their best, and giving them confidence in their playing. Hearty appreciation of the efforts of the choir and band boys has been shown by officers and boys of the institution. All this is a fitting acknowledgment that the boys have labored hard and earnestly to do well the task given them, and I sincerely hope that the knowledge gained during the last year will be a stepping-stone,— an added encouragement to a higher, more successful and nobler life, be it in the limitless field of music, or something else. This is the object of our teaching.

The band is well equipped with good instruments, music and uniforms, although I would suggest the purchase of one more E*b* Bass, 4 valve Trombones, 4 Mellophones, and 2 B*b* Clarinets. With this addition the band would harmonize much better and fuller.

Value of band and orchestra instruments	$650 00
Value of equipment	75 00
Value of music	550 00
Value of uniforms	300 00
Value of choir music	150 00
Approximate cost of operating department	698 37

In conclusion, I desire to thank you for the many favors and assistance given me, and to also thank Assistant Superintendent Stirling, and all other officers for their help and kindly encouragement.

Very respectfully,

E. F. SULLIVAN,
Musical Director.

CABINET DEPARTMENT.

C. B. ADAMS, *Superintendent:*

DEAR SIR: — I herewith submit my report for the year ending November 15, 1905.

ARTICLES MADE.

14 teachers' desks,
1 oak book case,
1 shoe case, 72 pigeon holes,
1 toothbrush case,
1 file case,
2 music racks,
1 stepladder,
1 pattern for casting for range lid,
6 cross arms for electric light plant,
6 carrying boxes,
3 closet seats,
1 oak case,
1 desk top, pigeon hole with doors,
1 chest.

Have helped place school seats in school building, have done all general repair work and have relieved in band, laundry, house, hospital and force.

Respectfully,

D. GROVE.

SEWING ROOM.

C. B. Adams, *Superintendent:*

Dear Sir: — I have the honor to herewith submit my report for the year ending November 15, 1905.

ARTICLES MADE.

Day shirts	1,829
Night shirts	1,250
Jackets	112
Aprons	222
Towels (hemmed)	1,960
Table cloths (hemmed)	153
Napkins (hemmed)	2,772
Sheets (hemmed)	475
Pillow slips	620
Pillow ticks	58
Pillows	31
Comforts	11
Bed ticks	61
Bed pads	2
Bed ticks made over	93
Caps	32
Basket linings	8
Window curtains	7
Napkins for milk room	14
Buggy covers	2
Motor covers	4
Strainers	2
Finger stalls	84
Table covers	5

Would respectfully recommend the purchase of one sewing machine, two tables and one desk.

Respectfully submitted,

N. L. Quinn.

MENDING ROOM.

C. B. ADAMS, *Superintendent:*

DEAR SIR: — I have the honor to herewith submit my report for the year ending November 15, 1905.

Number of pieces mended	51,672
Number of machines in use	10
Number of spools of thread used	1,445
Number of needles used	63
Number of spools of thread on hand	1,776
Number of needles on hand	152
Number of boys employed	40

Respectfully,

MARY E. TOWSLEY.

HORSE BARN.

COL. C. B. ADAMS, *Superintendent:*

DEAR SIR: — I have the honor to submit a report of this department for the year ending November 15, 1905.

All the dirt, stone, brick, sand, lumber and slate, as well as motors, fans, tin, pipe, tile and cement for buildings erected the past year, have been hauled. Teams were furnished for farming, gardening, mowing grass, and brick making. All brick moulded, and clay for making same, were hauled to places where needed. A greater part of the wood used in the burning of brick was hauled by this department; also all cars of goods unloaded and delivered to proper places.

Six young horses were added during the year, all of which are in good condition, but the usefulness of the horses that were in this department, when I took charge five years ago, is about past. Would respectfully recommend three new teams being purchased; also one phaeton, three wagons, size No. 1, two sets of single driving harness, and that all double and single rigs be painted.

By the replacing of new gutters and down spouts on old barn, this building is in fine shape, excepting stall posts, which I would respectfully recommend for the thirty stalls.

The barn is equipped with the following:

Horses 17, colts 3, mules 10, valued at	$3,000 00
Wagons 10, carts 3, valued at	300 00
Carriages, buggies and runabouts 13, valued at	1,200 00
Double driving harness, 3 sets, valued at	175 00
Single driving harness, 7 sets, valued at	175 00
Work harness 14 sets, cart harness 3 sets, valued at	300 00
Robes and blankets, valued at	100 00
Furniture in room and office, valued at	40 00

FORAGE ON HAND AND VALUE.

Hay, 31 tons	$254 20
Straw, 7½ tons	26 25
Corn, 357 bushels	142 80
Oats, 650 bushels	240 50

FORAGE USED AND VALUE.

Hay, 118 tons	$1,062 00
Straw, 31½ tons	134 25
Corn, 2,365 bushels	989 65
Oats, 843 bushels	311 91

Approximate cost of operating department, $3,742.44. Thanking you, Mr. Stirling and Mr. Hilles for favors shown, I am,

Very respectfully,

A. NAYLOR,
Officer in Charge.

EXPRESS DEPARTMENT.

C. B. Adams, *Superintendent:*

Dear Sir: — I herewith submit the report of this department for the year ending November 15, 1905.

Mr. Geer, who had charge of the department last year, is now in charge of another department, and the express department has been combined with the horse barn department. With the assistance of two boys, Ora Doudna and John Fink, of whom I wish to make special mention, as having proven themselves trustworthy and honest, the following trips have been made, with two mules, one double and two single express wagons, and one dray:

Traction line	1,361
Ohio side	1,253
Laundry	1,153
Hauling of garbage	945
General farm business	504
Packages received	8,615
Packages delivered	6,830

Would respectfully recommend the purchase of one set single express harness, 1 draw, or the one in use be given a general overhauling.

Cost of operating department, $543.84.

Thanking you and all superior officers for courtesies shown, I am,

Respectfully,

A. Naylor.

VISITORS' GUIDE REPORT.

COL. C. B. ADAMS, *Superintendent:*

DEAR SIR: — I beg leave to report to you that since the beginning of my work here, June 21st, about six thousand persons have visited the institution. These visitors represent not only the State of Ohio, but many other states, and especially those of the west. And, will you permit me to add, that my duties have been pleasant and congenial, and that I believe much has been done and may yet be accomplished in the way of correcting false impressions regarding the methods of the institution in caring for the boys committed to its keeping, and in the dissemination of true and correct ideas regarding the life of the boys here.

RECAPITULATION.

June 21st to 30th	138	visitors.
July	945	"
August	2,978	"
September	1,077	"
October	862	"
November to 15th	158	"
A total of	6,158	visitors.

Respectfully submitted,

J. M. SUTPHEN,
Visitors' Guide.

Financial Officers Annual Report 1905.

(531)

FINANCIAL OFFICER'S REPORT, BOYS' INDUSTRIAL SCHOOL.

LANCASTER, OHIO, November 15, 1905.

To the Board of Trustees:

I herewith submit to you the Annual Report of the Financial Department of this Institution, for the fiscal year ending November 15, 1905.

Respectfully,

W. N. HILLES,
Financial Officer.

REPORT OF THE BOARD OF TRUSTEES.

To His Excellency, MYRON T. HERRICK, *Governor of Ohio:*

DEAR SIR: — We have the honor to present herewith our report as Board of Trustees, embracing the operations of the Institution for Feeble-Minded for the fiscal year ending November 15, 1905, this being the forty-ninth annual report of this Institution.

The reports of the Superintendent and Financial Officer are submitted with ours.

There has been during the year a daily average of 1,188 children actual residents of the Institution. There has been expended for the maintenance and education of children for the past year $185,857.25, based upon the actual number of residents, which makes a per capita cost of $156.45.

The Custodial buildings on the farm which were under construction at the time of our last year's report are now completed and ready for occupancy, but this has been deferred on account of the lack of laundry facilities.

As there was an appropriation for the construction of other buildings on the Custodial farm we employed Frank L. Packard, Architect, to arrange plans and specifications. A general plan for a system of buildings was also adopted by your Board and contracts were let to R. H. Evans & Co. for the construction of the following buildings: One dining hall, one laundry building, one kitchen and cold storage building, and one power house building, at a cost of $126,000.00, in addition to material furnished by the state, these buildings to be completed by January 1, 1907.

There was an appropriation for the improvement of the road at the Custodial farm. Plans and specifications were drawn by Frank L. Packard, of Columbus, and a contract was awarded to W. V. Moler for the construction of the same for $2,834.00. This road has not been completed at this time.

At the home institution contracts were made with The Erner-Hopkins Co. for an addition to the electric light plant and boiler house of one Babcock and Wilcox tubular boiler, one Shepherd engine and Westinghouse generator, with all attachments, for $17,297.00. This work, we are pleased to say, is nearly completed, and in a very satisfactory manner.

We have made the usual progress in repairs and improvements and are glad to mention that for the wants of the Institution during the

last year the Legislature made ample provisions which have been used in the most economical manner possible.

It grieves us to mention the great loss that the Institution has sustained during the last year by the death of its most courteous and able Superintendent, Dr. G. A. Doren, and by death the removal of Mr. George Evans, for the last sixteen years the honest and competent Steward of the Institution.

At the time of Dr. Doren's death the Board adopted the following memorial:

This Board desires, gratefully, and affectionately, to place on record the following minute of its high appreciation of the character and services of Dr. Doren, late Superintendent of this Institution.

Dr. Doren died on Thursday, March 23, 1905, in the sixty-seventh year of his age, of heart failure, caused by a complicated attack of grippe. He was born May 25, 1838, in Athens, Tenn., of French and Scottish parentage, and removed to Ohio with his parents, who finally settled at Columbus when he was about twelve years old. He soon left school to help support his father's family, being employed for a while in the bakery and confectionery business. Later on, he studied medicine, first in a private office, and afterward graduated, in 1859, from the Berkshire Medical College, Pittsfield, Mass.

Returning directly to Columbus, he was at once employed as an assistant to Dr. Patterson, then in charge of this institution, which was then located in the building now the Home of the Friendless, on Main Street, east of Parsons Avenue, and which contained, at the time, thirty or forty children. Within a year, Dr. Patterson removed from Columbus, and Dr. Doren was appointed Superintendent pro tem. Shortly afterwards, however, he was elected full superintendent, a position which he held steadily until his death, covering a period of forty-six years.

In 1868 the institution was removed to its present site, having about fifty pupils, but within a year this number had increased to three hundred. Under Dr. Doren's oversight and administration it has grown until it has now thirteen hundred children under its care, a group of noble buildings, and at last, a great Custodial Farm of sixteen hundred acres, with its own fine buildings, and its own stock and farm produce for the healthy and happy employment of adult feeble-minded males, and for the support of the table of the main institution.

Thus Dr. Doren's services cover, practically, the whole life of the institution. No other of our state institutions has such a record. Their official positions have too often been the prey of political jobbers. But Dr. Doren's ability, integrity and devotion to duty, made it impossible for politicians to supplant or influence him, or in any way disturb the stronghold he kept on the universal public respect.

Dr. Doren was a high authority on the subject of the defective classes and their treatment. He not only read hard and kept himself constantly abreast of all the latest progress in his profession and specialty, but was also a constant contributor to the literature of the latter subject. His rare strength and breadth of mind made him an unusually fine and successful executive officer, enabling him to master every department of organization and administration in the institution, from agriculture to architecture and finance. On the other hand, he knew every detail of the internal economy of the institution, and made free and full use of the most modern methods in the teaching, training and healthful diversion of the children. Yet it was always evident that his interest in the work was not merely professional; it was largely personal. His heart was in

it, and he took an affectionate interest especially in the individual pupils and their cases.

Altogether, this institution has been most fortunate in enjoying Dr. Doren's services for so many years. It will be impossible to replace him, and difficult to find a worthy successor. As a man, a gentleman, a conscientious physician and noble philanthropist, he was an ornament and blessing to his fellowmen. It was a privilege to know him, and especially to be associated with him in his work.

On the first day of May, Dr. E. H. Rorick, of Fulton County, was selected as Superintendent, and on May 23d at a regular meeting of the Board, Mrs. E. H. Rorick was appointed as principal of schools, and Dr. D. S. Burns, as an assistant physician. Since the illness and death of Mr. Evans, E. T. Pierce, of Fayette, Ohio, has been the acting steward.

We also desire before closing our report to call attention to the long and faithful service of Mrs. G. A. Doren, as principal of schools, and Miss H. F. Purple, matron. These ladies have been to the state, public benefactors, and their retirement from the institution after more than forty years of constant and efficient service is a serious loss.

Estimates for 1906 and 1907 are as follows:

1906.

Current Expenses	$160,000 00
Salaries and trustees' expenses	19,500 00
Repairs and improvements	30,000 00
Furniture and carpets	2,500 00

1907.

Current expenses	$160,000 00
Salaries and trustees' expenses	19,500 00
Repairs and improvements	30,000 00
Furniture and carpets	2,500 00

We attach herewith the following estimates of the architect for the construction and completion of buildings at the Custodial Farm, a portion of said buildings being now under contract:

APPROPRIATIONS TO BE ASKED FOR.

1906.

Office building and rooms	$44,000 00
Cottage	23,000 00
Boilers, pumps and power piping	25,000 00
Electrical equipment, two engines, two generators, one switchboard	18,500 00
Heating, including pipes in tunnel	30,000 00
Electric wiring in tunnels	6,500 00
Plumbing	10,800 00
Tunnels	15,000 00
Total appropriation for 1906	$187,800 00

1907.

Three cottages (including plumbing and heating)	$90,000 00
Refrigerating machinery and cold storage plant	25,000 00
Water supply (stand pipe, pumps and distribution)	15,000 00
Sewage	8,000 00
Furnishings	26,000 00
Grading and roadways	6,000 00
Total appropriation for 1907	$170,000 00
Total appropriation for 1907	$170,000 00
Total appropriation for 1906	187,800 00
	$357,800 00

Respectfully submitted,

R. MEHAFFEY,
A. P. BALDWIN,
WM. E. HAYNES,
BOYD VINCENT,
C. L. ALLEN.

REPORT OF THE SUPERINTENDENT.

To the Honorable Board of Trustees:

GENTLEMEN: — It is my pleasure to present for your consideration my first annual report as Superintendent, being the 49th annual report of the Institution for Feeble-Minded. The report of the Steward accompanies mine.

The number of inmates in the Institution since the date of the last report has been fourteen hundred and fifty-five; eight hundred and twenty-six boys, six hundred and twenty-nine girls. Of this number forty-three have been removed, twenty-four boys, nineteen girls; twenty-one are away temporarily, fifteen boys, six girls; sixty-seven have died, forty boys, twenty-seven girls; leaving thirteen hundred and twenty-four, seven hundred and forty-seven boys, five hundred and seventy-seven girls, in the Institution November 15, 1905.

The causes of death were: Hydrocephalus one, tuberculosis twenty-six, epilepsy twelve, organic disease of the heart four, grippe four, bronchitis four, chronic abscess one, inflammation of brain one, acute myalitis one, septicaemia one, enteritis one, paralysis three, dysentery three, internal injuries one, abscess of brain one, shock from burn one, typhoid fever one, acute nephritis one.

The institution has escaped the invasion of contagious diseases throughout the year, but during the months of March, April and May there was a severe epidemic of la grippe, which, directly and indirectly, was the cause of many of the deaths which we have recorded.

We have drawn from the State Treasury for Current Expenses $148,167.38, and for officers' salaries and trustees' expenses $19,661.83, and we had at the beginning of the year $129,906.52 belonging to current expense fund, and there has been appropriated during the year $180,000.00, and we have at the close of the year $161,739.14; total amount expended $185,857.25 for maintenance of eleven hundred and eighty-eight children or $156.45 per capita.

Since my connection with the Institution it has been my desire to make all the repairs and improvements possible with the money that has been left at our disposal, and under your kind suggestions, special attention has been given the construction of a new road and walk from the front gate to the Institution door. This, in some particulars, has not been completed up to this time. As the surface sewage of the institution and grounds lacked completion and much of the old sewer was out of repair particular attention has been given this, and we are able to say that the system is now complete and in perfect order. At our last Board

meeting permission was granted by you, through a resolution, for the institution to make direct connections of our sanitary sewage system with that of the city. This has since been completed, and we are glad to mention that at this time we are entirely able to dispose of our sewage without the assistance of the pumping station erected for this purpose. This, I think, on the whole, will be an advantage to the state from an economical standpoint.

During the last year an elegant greenhouse has been constructed for the use of the institution, and at this time many flowers are furnished to make cheerful the various school rooms, sitting rooms and dining rooms of the place. From the old horse and carriage barn practically a new one has been constructed which is complete in every particular. The "large boys' building" has been remodeled, rebuilt and painted so that it now presents a very commendable appearance. The Legislature made a very liberal appropriation for the replumbing of the institution, which was greatly needed, not only for convenience but for the sanitary improvement of the place. During the summer these changes in plumbing have been made in a very satisfactory manner. General painting of the various rooms and departments of the institution, both outside and inside, has been vigorously carried on. A contract for the placing of a telephone exchange in the institution was arranged with the O'Kane, Hull Company. This is now in excellent working condition and offers us great convenience, and I am sure will be a great saving to the state. A new bake shop has been arranged with all the modern improvements. We are glad to mention that the products of the farm and garden have been abundant in the extreme, and to this, to a great extent, is due our lower per capita cost.

We were very kindly remembered by the Board of State Charities who have visited us at various times, and have expressed themselves as pleased with the internal affairs of the institution. On November 13th the institution was visited by the British Royal Commission appointed by King Edward to visit the various institutions in the United States, for the care and education of the feeble-minded. Their investigation was thorough and critical. They gave us the impression that this institution was above the standard.

The official changes have been mentioned by you in your report to the Governor. Since my connection with the institution, 200 children have been admitted.

Thus, briefly stated, are a few of the facts which go to make up another year's history of the institution for feeble-minded. In conclusion, I desire to express my gratitude to the employes for their faithful performance of their duties, and to the officers for the assistance they have rendered me in the management of the affairs of the institution.

Finally, gentlemen, I desire to thank you for the confidence you have placed in me by selecting me to succeed so eminent and competent a gen-

tleman as Dr. Doren, for certainly it was with great embarrassment and misgiving that I took up the great work imposed upon me, but with your kind assistance and counsel I have been sustained in my efforts to relieve the unfortunates committed to my care.

Respectfully submitted,

E. H. RORICK,
Superintendent.

FINANCIAL OFFICER'S ANNUAL REPORT.

E. H. Rorick, M. D., *Superintendent:*

Dear Sir: — I have the honor to present this, the Forty-ninth Annual Report of the financial transactions of this institution for the year ending November 15, 1905.

Yours truly,

E. T. Pierce,
Financial Officer.

SEVENTEENTH ANNUAL REPORT

OF THE

Board of Trustees and Officers

OF THE

Ohio Soldiers' and Sailors' Home

TO THE

Governor of Ohio

FOR THE

Year Ending November 15, 1905.

Vol. III. 48 EX. D.

REPORT OF BOARD OF TRUSTEES OF STATE SOLDIERS' HOME.

ERIE COUNTY, OHIO, November 16, 1905.

To the HON. MYRON T. HERRICK, *Governor of Ohio:*

DEAR SIR: — The Trustees of the Ohio Soldiers' and Sailors' Home respectfully submit herewith their Annual Report for the year ending November 15, 1905. The reports of the Commandant, Adjutant, Quartermaster, Surgeon, Treasurer and Chaplain are appended and made a part of this report.

The grounds and avenues have been improved during the year, and the campus presents a more beautiful appearance than ever before in the history of the Home. For details in regard to these improvements and other matters relative to the management of the Home we would respectfully call your attention to the report of the Commandant.

In comparing the expenditures of the Home with other public institutions of the State, it should be remembered that the Home clothes its members; that the water used is purchased from the city of Sandusky; that the expense of burial of deceased members is borne by the institution, and with advancing years the death rate is increasing. The average age is sixty-eight (68), and more than one hundred (100) veterans die annually at the Home.

Notwithstanding the increased prices of clothing and other supplies, the per capita cost of maintenance has been less than for many years past.

We call your special attention to the report of Major Haynes, Surgeon-in-Chief, relative to the important improvements that should be made in the Hospital. Dr. Haynes is one of the best surgeons in the country, connected with Military Hospitals, and his suggestions should receive careful consideration. Every possible comfort should be provided for the veterans of the Civil War who fought under "Old Glory" for the preservation of the Union.

The Board of Trustees commend the administration of General J. W. R. Cline, who has been faithful, energetic and efficient in the discharge of his duties as Commandant.

General Thomas T. Dill, who was elected President of this Board in May last, and who was one of the founders of the Home, has joined the ranks of that innumerable host who "fought the good fight" and gave their lives as true patriots that this government of the people might not "perish from the earth."

General Dill was a distinguished soldier during the Civil War, an

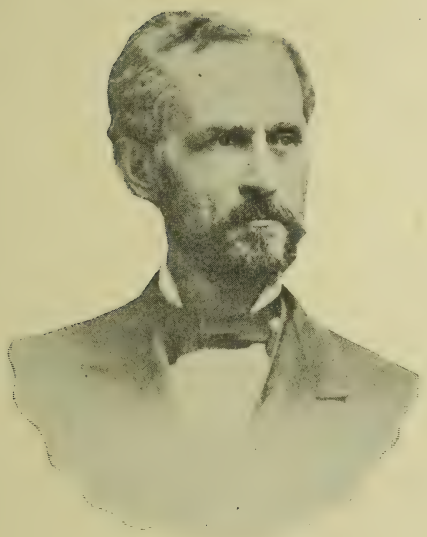

ideal citizen of sterling integrity, and the State and Home have suffered an irreparable loss.

Respectfully submitted,

F. G. Cross,
J. J. Sullivan,
J. L. Cameron,
W. P. Orr,
Trustees.

Annual Report of the Commandant.

(649)

GEN'L M. F. FORCE,
First Commandant of the O. S. S. & S. Home.

ANNUAL REPORT OF THE COMMANDANT.

NOVEMBER 15, 1905.

To the Honorable the Board of Trustees of the Ohio Soldiers' and Sailors' Home:

GENTLEMEN: — I have the honor to submit my annual report, with accompanying reports of the heads of departments of the Home, for the fiscal year ending November 15, 1905. Your attention is respectfully directed to these reports for full information as to the membership of the Home, the receipts and disbursements for the year, the operation of the Hospital Department and general details of the administration of the Home for the year.

COST OF SUBSISTENCE.

Notwithstanding the high prices of material and supplies that make up the items of expense in the maintenance of the Home and the unusual expenditures for a carriage, five (5) horses, an X-Ray machine for the Hospital and a large amount of improvements on grounds and buildings, the per capita cost of maintenance has been less, by $5.05, than for several years.

IMPROVEMENTS.

Much more than usual has been done this year in the work of improvements on the grounds, making roads and walks, grading and sodding, etc. The lakes from which we draw our supply of ice have have been enlarged and improved, so that our ice houses can, in the future, be filled at one cutting, without the necessity of using teams to haul the ice from the middle lake.

A toilet room was constructed in the station for the exclusive use of lady visitors and children.

The work of lining up the headstones in the Cemetery is completed, and the improved appearance is marked.

A 6-gun battery of artillery has, during this year, been planted on the parade ground, adding very much to the appearance of the campus.

The battery of boilers in the steam heating plant have been reset and put in good working condition.

HOSPITAL IMPROVEMENTS.

The Toilet and Bath rooms in the Hospital had, from long use, become so unsanitary on account of the old wood floors and wainscoting

that it became absolutely necessary to ask the Emergency Board for an appropriation, sufficient to meet the cost of the improvement, and a deficiency was therefore created to the amount of ten thousand dollars ($10,000.00) for the completion of the work. The contract for this work was let to Doersbach & Brother, of Sandusky. The work has not been prosecuted as vigorously as was desired, but is nearing completion.

There was a great need of suitable rooms for the care of the more enfeebled patients in the hospital, and some changes have been made for their betterment.

Two wards of the old hospital have been divided into separate rooms for two beds each, giving room for twenty-eight (28) patients, with two (2) additional rooms for the storage of the hospital linen. These rooms are to be used for the old, feeble, blind and helpless patients.

Aside from this, there has been a considerable improvement made in the new hospital. Three new dining rooms have been fitted up in the basement of one of the wards. One of these for the use of the female nurses, one for male nurses and a third for the assistant surgeons, and another large room has been fitted out or sleeping apartments for our corps of male nurses. A new and more sanitary and convenient morgue has also been constructed.

All these rooms are amply large, newly floored and plastered, well lighted and airy, and a great improvement over the old quarters, and dispense with one kitchen and the services of two cooks.

Some work has been done on cottages; pointing walls where cement had weathered out; some new plumbing has been done, some new floors laid and old ones repaired where needed.

Most of the windows in the cottages have been fitted with the Chamberlain Metal Weather Strip, which has proved very satisfactory, as well as economical in the matter of saving of fuel.

The expense of these improvements, outside of the Doersbach contract, has been nominal, as the carpenter's work, plumbing, painting and plaster have, to a great extent, been done by Home employes with such material as was on hand.

Butter cutting machines have been introduced during the year. The work accomplished by the use of these machines is entirely satisfactory and quite a saving over the old way.

Ever since the Home was established the soft soap used has been purchased from outside parties. This year we erected a soap making plant and have been making our own soap, which is of a superior quality and a saving of fifty per cent.

A water tower of sixty thousand gallons capacity, giving a pressure of sixty-five (65) pounds, has been erected in the rear of the power house. The work was done by the Chicago Bridge and Iron Works at a cost of four thousand seven hundred and ninety-eight dollars ($4,798.00). This will afford ample protection against fire.

As the water furnished by the city of Sandusky is, at times, *very bad,* I would recommend that a filter be installed, in connection with the tower, to purify the entire supply for the Home.

There has been two general musters and inspections since my last report. Inspector General N. M. Curtis, who inspected on both occasions, expressed himself as being entirely satisfied with the prevailing conditions in the Home, which are better than ever before.

The Home was favored with two visits by Governor Myron T. Herrick during the year, and he addressed the members of the Home assembled in Memorial Hall, and afterwards held a reception, which was very highly appreciated by the men.

RELIGIOUS.

Chapel services have been held regularly and have been well attended. In addition to these services, the Salvation Army holds religious services in the Home every two weeks, and their efforts are very successful and much appreciated. A marked improvement in the moral status of the Home is attested by the decreasing numbers of offenses against the rules of the home, and the fewer arrests made.

The number of arrests made in September and October, 1903, was 129
The number of arrests made in September and October, 1904, was 72
The number of arrests made in September and October, 1905, was 59

The Women's Relief Corps has been very generous to the enfeebled and suffering, and brought many comforts into the declining years of the veterans. A liberal supply of delicacies,— fruits, jellies, etc., have found their way into the hospital.

Their donation of eighty-five dollars ($85.00), expended for books for the library, came at a time when it was much needed, as was also the twenty-five dollars ($25.00) expended for settees which were placed about the grounds, in quiet shady nooks, where the weary ones may rest, have been a source of much comfort and enjoyment.

CAMP FIRES.

Two camp fires were held in the Home this year. The first on February 22d, in charge of General R. B. Brown and Captain J. M. Hughey, Committee from Department Encampment. Department Commander General B. M. Moulton and General R. B. Brown made able and rousing addresses to the veterans, which was much appreciated.

The second camp fire was held on April 14th, under the direction of the Women's Relief Corps. The special feature of this meeting was the presentation of a beautiful silk flag to the Home Post by Mrs. Sina B. Goddard, Department of the Women's Relief Corps.

AMUSEMENTS.

In the way of amusements there has been but little, though the Home has been favored with a few excellent band concerts, given by friends of the Home and a few entertainments of the minor sort, have been held in Assembly Hall.

MEMORIAL DAY.

Memorial Day, this year, seemed to carry with it a greater significance in the Home than ever before. As the years steal upon the men of '61-'65 they can but realize that soon for them —

> "The muffled drum's sad roll will beat
> The soldier's last tattoo."

The day was observed with impressive ceremonies by the veterans of the Home, assisted by the ladies of the Women's Relief Corps of the McMeens Post, G. A. R., of Sandusky, and the occasion was fitly emphasized by the stirring and masterly address given in Memorial Hall by Hon. J. Warren Keifer.

The amount allowed for the ordinary repair fund, in the past year was inadequate. The buildings, erected 18 and 19 years ago, begin to show age and need of attention in the way of repairs, and a much larger appropriation should be asked for, for this fund in order that the property may not fall into decay. I have made a careful estimate of repairs needed, and find that it will require twenty thousand two hundred and ten dollars ($20,210.00) to accomplish what is absolutely necessary.

I wish to signify my appreciation of the uniform courtesy and kindness shown me by the members of the Board of Trustees and to make grateful acknowledgment of their assistance and co-operation in the management of the affairs of the Home. To this assistance and co-operation, and to the efficiency, faithfulness to duty, and the untiring energy of the heads of departments in the effort to advance this institution to a higher standard, is largely due whatever measure of success has been attained.

Respectfully submitted,

J. W. R. Cline,
Commandant.

ADJUTANT'S REPORT.

ADJUTANT'S OFFICE,
OHIO SOLDIERS' AND SAILORS' HOME,
NOVEMBER 16, 1905.

GENERAL J. W. R. CLINE, *Commandant:*

GENERAL: — I have the honor to make the following report from the records of this office for the year ending November 15, 1905.

Number on the roll November 15, 1904		1,512
Gained by admission	278

		228
Aggregate present and absent		1,494
Average number present during the year		1,197
Average number present and absent during the year		1,491
Whole number cared for during the year		1,982

Average age of present membership, 66 years, 7 months and 24 days.

Average age of members who died during the year, 67 years, 2 months and 14 days.

Average age of Spanish-American membership present, 41 years, 7 months and 6 days.

There are now 109 notices out for men to report for admission on approved applications.

There are 81 applications for admission now on file not reached by the Board of Trustees.

One hundred and forty-seven of the participants of the Spanish-American

GEN'L J. W. R. CLINE,
Commandant O. S. S. & S. Home.

War have been admitted to the "Home" to this date; of this number 122 have been lost by discharge and death, 25 remaining on our roll.

Very respectfully,

Your obedient servant,

J. D. WHEELER,
Adjutant.

TREASURER'S REPORT.

NOVEMBER 15, 1905.

GENERAL J. W. R. CLINE, *Commandant:*

SIR: — I have the honor to submit the following report showing the amount of business transacted in this office for the year ending November 15, 1905:

RECEIPTS.

Balance on hand, Nov. 15, 1904	$1,783 81
Received from pensioners during the year	169,903 28
Total	$171,687 09

DISBURSEMENTS.

Paid to sundry pensioners during the year		$167,789 49
Cash in bank	$3,553 71	
Cash in hands of Treasurer	343 89	
		3,897 60
Total		$171,687 09
Amount due to sundry pensioners, Nov. 15, 1905		$3,897 60

Very respectfully,

CHARLES A. REESER,
Treasurer.

Surgeon's Report for Year Ending November 15, 1905.

(661)

SURGEON'S REPORT.

To the Commandant:

I respectfully submit the following report of the hospital department of this institution for the year ending November 15, 1905:

Patients in hospital November 15th, 1904	232	
Admitted to hospital during year	280	
Returned from furlough during year	315	
		827
Discharged from hospital during year	206	
Furloughed from hospital during year	314	
Died in hospital during year	85	
Patients in hospital November 15th, 1905	222	
		827
Total number of deaths in hospital and Home	91	
Ratio of deaths per 1,000 for daily average present	76+	
Average age of deaths in hospital	68+	
Treatments at sick call	20,248	
Treatments at special call	2,625	
Treatments in quarters	366	
Treatments in hospital	75,854	
Daily average treated in hospital and quarters	270	
Number of prescriptions accounted for	59,719	
Average cost of prescription	04.$\frac{3}{5}$c	
Supplies on hand November 15th, 1904	$1,192 69	
Purchased during year	3,036 06	
Total		$4,228 75
Expended during year		2,772 04
Amount on hand November 15th, 1905		$1,456 71

COMPARATIVE STATEMENT.

	1904.	1905.
Admitted during year	349	280
Discharged during year	225	206
Furloughed during year	412	314
Died in hospital during year	92	85
Treated at sick call	1,441	1,216
Treated at special call	249	186
Treated in quarters	411	224
Treated in hospital	612	565
Prescriptions accounted for	63,043	59,719
Average cost of prescription	05.11/12c	04.$\frac{3}{5}$c
Supplies purchased during year	$2,741 67	$3,036 06

The tables give the desired information. At the close of the last year there were present in hospital quarters 232 patients, where this year there are 222. The daily average cared for in hospital and camp is 270 as compared with 290 last year. The number of prescriptions as accounted for is 59,719 as compared with 63,043 of last year. Every year a marked change is shown and so it must be, for every year adds to the age of the men in the Home. The average age this year is 68.4 years. How far past the average age of men this is and yet the average member of the Home is in possession of sufficient vigor to enable him to be still a very useful man in many ways. This high average is no secret. It is not a question of medical skill so far as materials come to be a factor, but is almost wholly due to care, no exposure, no over exertion, regularity in eating, bathing and sleeping, all of the greatest importance and all lend a strong support to increase of years. These are the beneficial conditions of institution life, and they should not be lost sight of.

During the past summer season some very important improvements have been made about the hospital. The basement of Ward "D" had been nothing but a long, dark room, where dust and dirt had accumulated year after year. This place was converted into a number of very useful rooms. At the extreme end was constructed a very good room for morgue purposes, provided with good light and ventilation. A dining room for the hospital detailed help, one for the Assistant Surgeons, and another for the lady nurses were placed in this basement, and these rooms are large and comfortable. In addition to all this, four small rooms were built in the remaining space, to be used as private bed rooms for men on night duty. Another room under Ward "C," sufficient to accommodate four men, was also fitted up. When the lady nurses' dining room was changed to the basement room, this outside room was then occupied by night help. These three rooms meet all the requirements for the night help for the time, but next year I trust that even better arrangements can be made for them.

During the past year a large amount of much needed material was purchased for the hospital. This purchase included only articles for which the hospital was badly in need. A number of heavy wheel chairs for outside work, a complete equipment for the major surgery, compressed air apparatus and nebulizer, a large number of canvass bed rests, rubber tired, ball bearing carriages for the handling of the sick, aseptic dressing carriages for surgical ward and a great many minor needs. An exceedingly fine and perfectly equipped X-ray machine was purchased. This has been a great aid in the care of the injured, for by means of it, diagnoses are not only verified but made plain. In the work of fractures alone this apparatus has been very useful, for the picture is easily obtained showing exactly the kind of injury and the nature of deformity. A complete microscopic outfit has been added to the hospital equipment. Since so many doubtful conditions are to-day determined by the use of

GEN'L THOS. T. DILL,
Late Pres. Board of Trustees.

this instrument, now lacking in methods of precision is any surgeon without the aid of microscopic accuracy.

The best work accomplished last year at the hospital was the complete reconstruction of the closets and bath rooms. Nothing could have been of more importance, for the wood work had not only become rotten from the contact with various fluids, but the health of the hospital member had come to be seriously threatened by the increasingly vitiated atmosphere caused largely by the poisonous vapors arising from this source. This old wood work has all been removed and in its place concrete covered with mosaic tile flooring, pretty of design and complete in workmanship, with solid marble wainscoting have been put in. The contrast, both in appearance and service is so great that I do not feel that any comparisons need be made. All this change cost a great amount of suffering, mental on the part of the hospital staff, and actual physical suffering on the part of many of the members of the hospital, for to accomplish this work the service ends of the ward had to be shut off from use, so that for nearly three months the entire hospital was furnished only with two bath rooms and two closet rooms. With all this discomfort there was really no complaint from the old men, for it was evident to them that everything was being done that could be accomplished. The lady nurses and male attendants were very much burdened, and it required strict attention to duty to avoid a condition of chaos, but out of the burning we have all come in our strictly hygienic dress, thoroughly equipped for any thing that may be required of us.

No greater change has been made anywhere in the Home than was accomplished when Wards "1" and "2" were converted into small rooms for private use. These two wards were the most uninviting rooms to be found anywhere, dark and cold, badly heated, poorly ventilated and full of air holes from one end to the other. The old wooden wainscoting which was on the walls, was all removed and this bug-breeding place thoroughly closed up with lath and plaster. The closets and bath rooms were the worst ever seen, but by the aid of the extra fund, no more thoroughly equipped rooms could be desired than are now in these wards. Instead now, of two dark, cold and unhealthful rooms for the care of the sick we have fourteen small rooms, each of them large enough for two patients, well lighted, heated, and properly ventilated, and in condition to give more comfort to those cases which absolutely require more or less exclusion. Small rooms for private cases was one of the crying needs of the hospital, and by this means we have been able to meet this demand.

There are some very important changes in demand at the hospital, the most pressing of which I desire to call your attention to. The basement room under the rear building which has been used since the opening of the hospital for kitchen accommodations has long since passed its day of completeness, and at the present time is far from meeting the require-

ments of the hospital. When this room was fitted up for kitchen work there was not more than half the number to care for that we now have, and at that time it answered the purpose fairly well. To-day it is hardly possible to accomplish enough from this department to meet the demands, and to do even this it necessarily requires double the labor that should of right be expected. The conveniences of this room are so few as to be unworthy of consideration. The cold storage, store rooms for vegetables and supplies, in fact all these necessary additions to a kitchen of this magnitude are entirely lacking. My suggestion is to abandon this basement for this work and construct a building outside of the hospital circle but connected by corridor above and below. This building to have the kitchen and additional accommodations on the first floor and in the lower room, store rooms and vegetable cellars, and all things else that are needed. I believe this suggestion is correct, and I trust that this reformation will soon be accomplished.

The monthly reports for the past year show the need of more complete equipment for the care of the constantly increasing numbers of sick, injured and aged. When the present hospital was laid out, the intention of the Board of Trustees was to place the corridor in direct line with the door and hallway of the old stone hospital, so that when the time had come for these two buildings to be connected, this could be done with very little trouble and expense. The time has surely come, and the demand for this improvement has reached the point of necessity, for all the space to be had is now occupied and the height of hospital membership has not yet been reached. The fourteen private rooms so nicely fitted up this past season will render but little service without this connection, for in order to obtain the required and desired service from any building for hospital purposes, it must first be under complete control as to entrances and exits. Under the existing and long standing conditions, all the food taken to the old hospital and annex is carried over by the weekly detail, through sun shine and rain, bitter cold and melting heat, in fact, three times each day of the year the food must be carried across through the open to the dining room. This can not be done away with except by completing the original plans, that of extending the corridor system from the new to the old hospital building.

I can not refrain from again directing your attention to some important facts in connection with the expense and manner of heating the present hospital buildings. The entire new hospital is heated with hot water and the old hospital with steam. In the old hospital building are kept the consumptive sick, those borne down by Father Time's heavy hand, those suffering from acute infectious and contagious diseases, those suffering from malignant diseases and the so-styled dirty, destructive and helpless sick.. In these buildings the steam heat is not continued so late in the spring nor turned on as early in the fall as the season often demands, and this is because of the enormous expense of operating the

large steam plant. During these periods all the heat that can be had is that furnished by a few stoves. The new hospital building is heated by a hot water system, each building, eight in all, having its own plant. So far as the service goes with the hot water heating it is all that anyone could desire, but to operate it properly requires the expenditure of a large sum of money, and that is what I desire to do away with. The cost of operating this hot water plant from September to May, the entire season, is a little more than $4,000. The point I wish to emphasize is, that the heating of the old buildings is not satisfactory, and that of the new too expensive, and I believe that these conditions can be met and made better by doing away with the hot water furnaces (or rather the operating of them) in the new part and the steam heat in the old and then heat the entire hospital system by hot water pumped from the main boiler plant. This change would necessitate the expenditure of money in the purchase of pipes and pumps, but these things all told would cost but little more, if that, than the expense of heating the hospital one season, and the after expense would be but a trifle, comparatively, as the water should be heated by the same coal used for the other work, and without any increase, and the same force of firemen should look after the pumping apparatus. I have talked with the engineer and from him obtained the support for this recommendation. Apart from the expense of the proposition is another quite important one, the handling of the coal now used at the hospital. These buildings are not exactly on the railroad switch, so that all of this coal must be shoveled out of the cars into dump wagons, hauled to the hospital, dumped on the ground, shoveled into the buildings and then again worked back so as to find room for a season's supply. When this work has to be done in the dead of winter, with cold, snow and ice to contend with, and then only men whose ages are dangerously near an average of seventy years, the allotted time of man, to do this disagreeable labor, it certainly makes it a question worthy of serious consideration, to say nothing of the saving of at least three-fourths of the expense each year.

The repair work in and about the hospital has been neglected or postponed so long that now it has assumed huge proportions, and if this continues much longer, an almost complete reconstruction will be a necessity. It has been a long time, how many years I will not attempt to state, since any paint has been applied to the outside wood, iron and tin work, or any varnish to the inside finishing. The effect of freeze and thaw and the frequent contact with water has practically destroyed all the varnish, so that now a great deal of the bare wood is exposed and the process of decay well under way in many places. The steps leading down from the rear of the ward buildings to the court inside are of wood construction, and having been exposed to the weather continuously for years have become so far decayed as to be dangerous to the old men who pass up and down thereon. Owing to the fact that

these steps must be repaired or rebuilt, and that too, in the very near future, I suggest as a matter both of economy and safety, that the next construction be of iron.

I invite your attention to the proportions of the Lady Nurses' Cottage. A visit to this building of only five minutes' duration will be sufficient to convince any one of the need of more room. This house has really no accommodations, has but six very small rooms, and yet for a long period has been furnishing bed room and living room for never less than seven adults. I suggest that the building be extended to the north, because in this direction there is abundant space and none of the walnut trees which make these grounds so pleasant and attractive will be sacrificed. This construction should not be on the expensive plan, and the work ought to be done complete for a sum not to exceed $2,000.00.

An elevator is another article on the want list at this hospital. There has never been any way to get the sick and afflicted into the hospital but to carry them up the long and steep flight of stairs at the entrance, and there has never been any other way to take the dead of the building from the ward to the morgue except to carry the same from the place last occupied, along the corridors and down the stairway to the basement below, and then to the morgue, and for these reasons alone, an elevator is very much needed. The best of the help that can be secured at the Home is too much broken down for the performance of these duties, and the need of an elevator to perform this burden is not far from a necessity. An apparatus sufficient for all practical purposes should cost not to exceed $300.00.

The question of help has already reached the point of seriousness at the Home. The report this year shows the average age very close to seventy years, and not many individuals are worth very much in the field of active labor even at sixty years. What is gradually but certainly approaching, the forecasting shadow of which has long since been plainly seen, is the outline of advanced old age, with figure bent and step uncertain, which can not be mistaken, demonstrating that the day of even partial activity is almost a thing of the past. Younger and stronger men must soon do the work now done by these old men, and when this day comes, which it surely will, and the work is of necessity performed by outside help, the expenses of the hospital will be very much increased. This is a matter which demands serious consideration and which will be presented very soon.

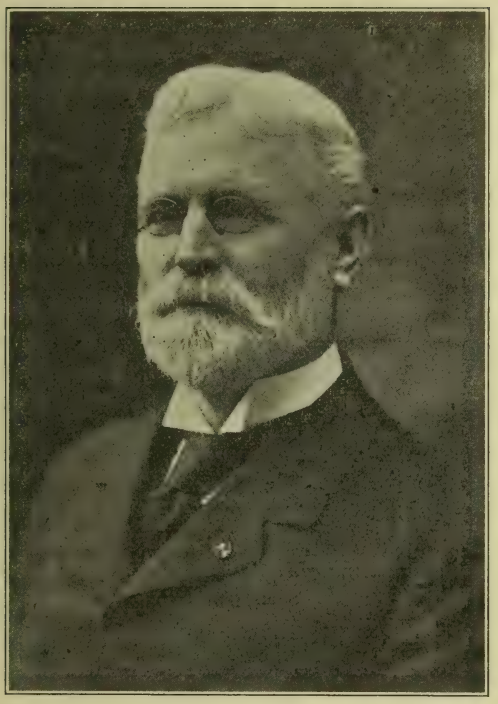

There are very many other important matters concerning the welfare of the old and afflicted members of this Home that I would be pleased to take up at this time, but I will not burden you longer with my never failing and always increasing want list. Another year has come and gone, and I feel very proud of the record indelibly placed on the pages of the past. Every one has been good to us, and I trust that

I have the proper feeling of gratitude to one and all for their kindly aid. The hospital department is constantly on the increase and will be for some years to come, so in order for a fair measure of success to be attained here, unity of thought and action are most important requisites.

Respectfully submitted,

J. T. HAYNES,
Surgeon.

November 20, 1905.

DR. F. G. CROSS,
Member of Board of Trustees.

CHAPLAIN'S REPORT.

STATE SOLDIERS' AND SAILORS' HOME, ERIE CO., OHIO,

NOVEMBER 15, 1905.

GENERAL J. W. R. CLINE, *Commandant:*

DEAR SIR: — At the close of another year we come to render an account of our stewardship. We give praise and thanksgiving to our Heavenly Father for His mercies and blessings vouchsafed unto us during the year.

RELIGIOUS SERVICES.

We have held the usual religious services regularly in the Assembly Hall. The moral tone of the Home has greatly improved within the past two years. Judging by what we see, and from what the men themselves tell us, the temperance sentiment is improving, and is making its influence felt among the comrades. Those who regularly attend the chapel services seem to be making a greater effort to promote religious feeling throughout the camp. The result has been to set religious principle upon a higher plane in our midst. Possibly these results are not the outcome of good work alone, but of the realization of the fact that we are nearing the end of this life, and the beginning of the life to come.

Our Sabbath school, organized and conducted by the wives of the soldiers, is doing much good. Mrs. H. J. Clements, the Superintendant, is a good Christian woman, every way fitted for the responsible position.

HOSPITAL WORK.

One is naturally drawn to this part of the work because of its great importance. The sick ones, separated from friends and home, although ministered unto in the greatest of kindness by the surgeons and nurses, desire and have a right to the services of the Chaplain, to send to loved ones the last message; to point them to the Lamb of God that taketh away the sin of the world; and to accompany them to the dark valley and shadow of death. What a work this is! Like Paul we exclaim: Who is sufficient for these things? No one, except the Lord of hosts be with him.

WOMAN'S RELIEF CORPS.

This body of loyal women have given substantial aid to my department of work. As the years go by, and they learn more of the real needs of the men, still greater things may be expected of them. The department President, Mrs. Lois M. Knauff, according to former customs, has

placed in my hands twenty-five dollars for the purchase of Bibles; she has promised that during her administration Sabbath services would be held by women specially adapted to that kind of work. A good woman speaker interests our people and draws a larger audience than any man is able to draw. Mrs. Emogene Marshall, Department Chaplain, and Mrs. Eva Center, Secretary of McMeen's Corps of Sandusky, make semi-monthly visits to the hospital. Mrs. Marshall frequently holds religious services here, always filling the pulpit with great acceptability.

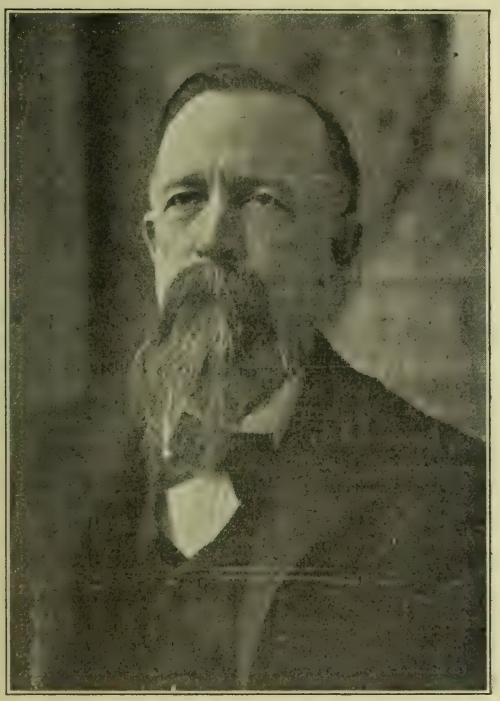

WITH THANKFULNESS TO ALL,

I shall close this report. I wish to express my appreciation and thanks for the courteous assistance and encouragement given me in my work by the Trustees, officers, comrades, and employes of the Home. I wish to thank you, General, for beautifying the grounds adjacent to the chapel, making them more pleasing and inviting. Your attendance at the services is always appreciated. Mrs. Cline is worthy of mention for her many kindnesses to us all. It would be very unkind to close this report without referring to those women,— as Paul said,— that labored with me in the gospel, not on a salary, but without money and without price. And now, beloved, let us buckle on the whole armor of God, and if spared and permitted, to work together in the Master's cause another year, let us resolve to be more faithful in His cause. Here in my study all alone with my Heavenly Father, I commend you unto Him that is able to keep you from falling, and to present you faultless before the presence of His glory with exceeding joy. To the only wise God our Savior be glory and majesty forever and ever. Amen.

Respectfully submitted,

W. M. HAINES,
Chaplain.

Annual Report of the Librarian.

COL. J. L. CAMERON,
Member Board of Trustees.

LIBRARIAN'S REPORT.

OHIO SOLDIERS' AND SAILORS' HOME, November 15, 1905.

GENERAL J. W. R. CLINE, *Commandant:*

SIR: — The following books and magazines have been issued from the library during the year ending November 15, 1905:

Month ending.	Biography.	History.	Fiction.	Miscellaneous.	Magazines.	German.	Totals.
December 15, 1904.....	51	114	948	883	622	33	2,651

September 15, 1905.....	16	131	853	765	573	6	2,344
October 15, 1905.....	19	130	836	775	515	5	2,280
November 15, 1905.....	33	146	918	860	571	8	2,536
Totals	499	1,532	11,216	10,283	7,575	213	31,318

The following books and magazines have been donated the Library the past year:

November 25, 1904: W. R. C., Toledo, Ohio, 375 magazines and 1 lot of miscellaneous illustrated papers; G. W. Ball, O. S. and S. Home, 40 magazines. December 3: W. R. C., Elyria, Ohio, 1 lot of magazines, illustrated papers, etc.; W. R. C., Berea, Ohio, 1 lot of magazines and papers. December 20: Josie Camp, Fostoria, Ohio, 1 lot of magazines; W. R. C., Hudson, Ohio, 3 volumes of fiction. January 23, 1905: E. H. McKee, Cottage "A", 1 volume "An Apache Princess." January 28: Prairie Depot, W. R. C., 24 magazines. February 3: Guide Pub. Co., Norwalk, Ohio, donation for 1 year, R. R. Guide for Central States (Monthly.) February 17: Stella Loutham, for Mart Armstrong W. R. C., No. 94, Lima, Ohio, 107 novelets, 87 magazines. February 28: W. R. C., Loraine, Ohio, 48 magazines. September 1: Mrs. C. B. Johnson, Middletown, Ohio, 1 large box, Miscellaneous magazines, etc. April 12: Mrs. Eugine Marshall, Sandusky, Ohio, 12 historical fine art series, "Uncle Sam's Navy." May 1: Cincinnati Public Library, Cincinnati, Ohio, 357 volumes fiction, 93 volumes miscellaneous books, 25 volumes German and French, 15 volumes poetry and history—

total, 490 volumes. May 25: W. A. Gray, Cottage "N," 1 volume No. 6 Ohio Roster, and 5 novelets. January 9: Captain Louis E. Lambert, St. Marys, Ohio, 45 volumes Sir Walter Scott's works in German, 15 volumes fiction, 11 novelets, 6 volumes miscellaneous, and 1 lot German illustrated papers. September 26: Charles Felton, Cottage "B," 1 volume Voigtländer and I. October 17: Mrs. Bitzer, 930 Jefferson St., Sandusky, Ohio, 1 lot of magazines. November 14: Franklin Eldridge, V. P. Nat. S. S. Co., Bellvidere, Ill., through W. H. Taylor, Cottage "H," 90 miscellaneous magazines.

Number of new books received	17
Number of old books received	557
Total	574

Respectfully,

JOSEPH P. ALBIN,
Librarian.

ADJUTANT'S REPORT.

STATE SOLDIERS' AND SAILORS' HOME, ERIE CO., OHIO,

DECEMBER 30, 1905.

HON. MYRON T. HERRICK, *Governor, Columbus, Ohio:*

DEAR SIR: — I have the honor to forward a list of the members of this "Home" who died the past year, which was overlooked by me when our Annual Report was sent.

Very respectfully,

Your obedient servant,

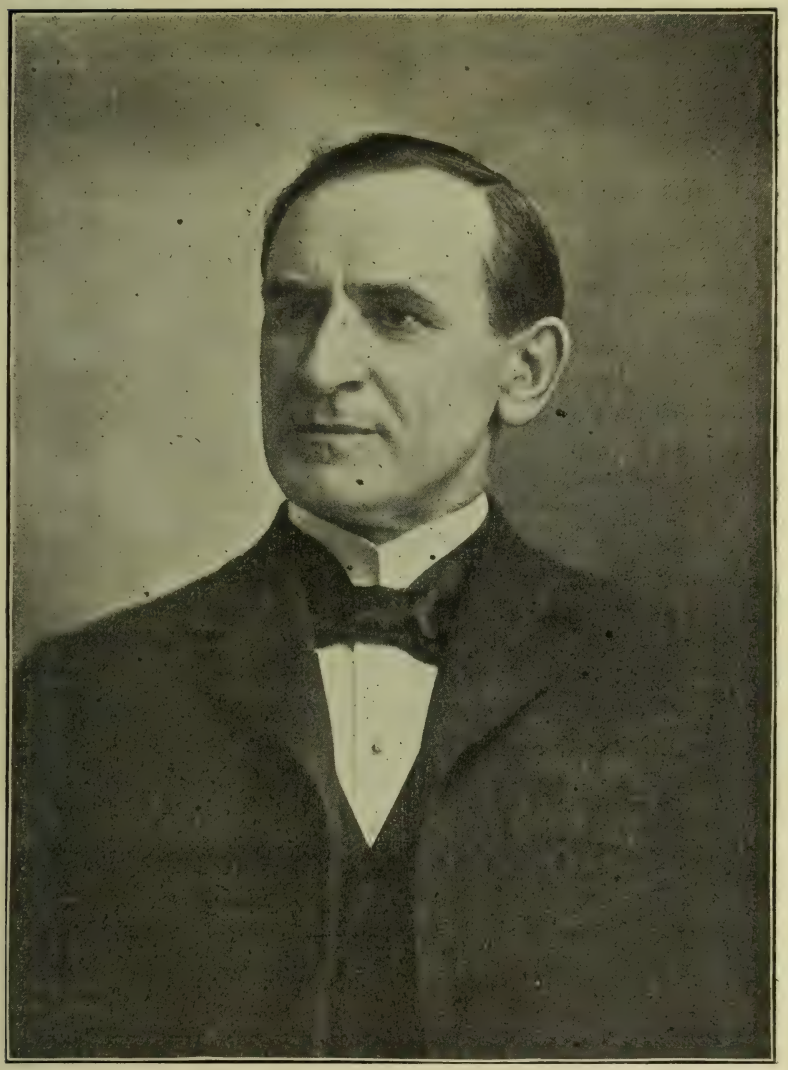

J. D. WHEELER,
Adjutant

REPORT OF THE BOARD OF LIBRARY COMMISSIONERS.

COLUMBUS, OHIO, November 15, 1905.

To His Excellency, MYRON T. HERRICK, *Governor of Ohio:*

SIR: — We have the honor to submit the sixtieth annual report of the Board of Library Commissioners, which is the tenth under the library act of 1896.

As predicted in our last annual report, the number of volumes in the State Library has grown to more than 100,000. Within the past year 8,612 volumes have been added to all departments, making a total of 106,143. This is the largest annual increase recorded in the history of the Library.

Continued care has been exercised in the selection of books, and it is believed that the standard previously established by the Board has been more than maintained. As stated in a former report, current fiction is not purchased for the general library. Several volumes of this character, acquired years ago and worn by subsequent use, have been withdrawn. The departments of history, travel, biography and sociology have been systematically strengthened. The issue of a monthly bulletin has been commenced. One of the objects of this publication is to acquaint patrons with recent accessions of the Library.

As the record of the Traveling Library Department is one of continued growth and widening utility, our summary of the work must be a repetition in substance, if not in words, of previous reports. Within the year 1,027 traveling libraries, aggregating 36,441 volumes have been sent to 806 different communities of the State. This is a substantial increase in libraries issued and volumes circulated, while 159 more communities were reached than last year. Ohio still leads all states in the number and distribution of its traveling libraries.

The additional rooms connecting the two departments of the State Library, for which provision was made at the last session of the Legislature, have been completed. To them have been transferred documents from the various states and many volumes of newspaper files. These rooms have not been equipped with heating apparatus. Provision for this need should promptly be made. In the near future more room must be provided if the work already so successfully inaugurated is to be carried forward as in other progressive states.

The work of a number of other state library commissions includes many lines of activity. Among these may be named library training, inspection and organization of public libraries, legislative reference

bureaus, and the collection, classification and arrangement of state archives. The Ohio Library Association has at different times urged the employment of a library organizer to aid in the establishment of new libraries and to give personal advice and assistance in libraries where such help is needed. On the part of students of history and others interested in the unpublished records of the State Government, a desire has frequently been expressed that a department of archives be created in which all manuscript papers of the state shall be classified, indexed and made readily accessible for purposes of reference. With adequate provision, the Board would be pleased to enter upon either or both of these lines of work. We shall, need, however, for these enterprises what has been provided in other states,— room, authority and appropriations.

In conclusion, we cannot too earnestly commend the efficient services of Charles B. Galbreath, the State Librarian, and the faithful support of the Library Staff.

The State could not have a more conscientious and efficient public servant than the present librarian. To him is due more than to all others, the credit for the great progress made in the State Library; under his management the Traveling Library Department has been made to reach into every county in the State, and the wise selection of books for the entire Library has been largely due to his painstaking, tireless industry and investigation.

The building up of such a library is the work of years and its continued and continuous growth requires knowledge, care and experience, in order that its symmetry shall not be marred and its usefulness thereby impaired.

Signed: J. F. McGrew,
Chas. Orr,
John McSweeney,
Board of Library Commissioners.

STATE LIBRARIAN'S REPORT.

COLUMBUS, OHIO, November 15, 1905.

To the Board of Library Commissioners:

GENTLEMEN: — I have the honor to submit to you the report of the State Librarian for the year ending November 15, 1905. Within the past year additions have been made as follows:

		Volumes.
To the Traveling Library Department		5,489
To the General Library		3,275
Total		8,764
Withdrawn	93	
To replace other copies	59	152
Net increase since last report		8,612

The number of volumes in the State Library at the close of last year was 97,531. This, with the net increase for the year, makes a total of 106,143 volumes.

ADDITIONS TO THE LIBRARY.

Appended to this report is a list of the additions to the Library for the year. The earlier volumes of the Gentleman's Magazine, mentioned in the last report, upon more careful examination were found to be in unsatisfactory condition and were returned to the dealer from whom they were ordered. The later volumes, indexed by Poole, have been bound and will soon be ready for the shelves. Among the sets of books subscribed for and regularly received as issued, are the following: "The Philippine Islands," edited by Blair and Robertson; "Early Western Travels," edited by Thwaites; and "The Victoria History of the Counties of England." In the list will be found "The Historians' History of the World" and other items of interest. Near the close of last year, Granger's "Index to Poetry and Recitations" was purchased. Within the year covered by this report, almost all the books indexed in this work have been added to the Library. They form a most valuable collection for ready reference to literary contributions covering a wide range.

CATALOGUING.

The thorough cataloguing of the Library, commenced some years ago, has been so frequently interrupted by demands for reference service in the Library, that it is still far from complete. The material relating to Ohio, now classified in a general way, should, as soon as possible, be more thoroughly analyzed and indexed. Thomson's "Bibliography of the State of Ohio," a card list of Ohio literary men and women, and other aids make access to this material comparatively satisfactory, but a careful re-cataloguing, with numerous cross-references, would greatly facilitate the work in this department.

REFERENCE WORK.

Reference work in the Library and by mail has steadily grown in recent years. Authors and students, seeking material for use in the writing of books and theses, members of study clubs engaged in the preparation of papers, and patrons desiring items of information not available from local sources, are in almost daily communication with the State Library. So long as this patronage is met in the proper spirit, there is certain to be a steadily increasing demand for such assistance.

In many instances, through the use of catalogues and indexes, it is possible to help patrons to the desired information without the loaning of books. The material may often be had in a magazine article, or a pamphlet, direct from the publisher or dealer at smaller cost than the expense of sending a book from the Library. Frequently, when the specific help wanted is not to be found in the Library, the patron may be directed elsewhere for it. The list of "Newspapers and Periodicals," in the different Libraries of the State, published by the State Library three years ago, has been much used for references to sources of local Ohio history.

NEWSPAPER CLIPPINGS.

The Library subscribes to a newspaper clipping bureau for items relating to Ohio. Obituary and biographical notices, accounts of family reunions, anniversary celebrations and local events of historic interest have been collected and roughly classified. They are to be arranged in scrap-books and indexed. An index to three of the leading Ohio papers, published in as many cities, would be valuable for reference purposes. Work of this character is done in other state libraries.

MONTHLY BULLETIN.

The issue of a monthly bulletin has been commenced. Thus far it has been devoted chiefly to the publication of recent additions to the Library. In the future occasional numbers will be given to special topics.

ADDITIONAL ROOMS.

The rooms connecting the Traveling and General Library Departments have been completed. There was appropriated for this improvement $5,000. Expenditures to date are as follows:

Advertising	$29 00
Frank L. Packard, Architect	233 35
J. W. Horlocker, Contractor	4,706 00
Erner–Hopkins Co.	12 50
Total	$4,980 75

This leaves a balance of $19.25.

LIBRARY ORGANIZER.

While responses to circular requests for information indicate encouraging activity among the libraries of the State, it is believed that library extension would be promoted by the employment of a competent person whose duties should be to give assistance to those in charge of the smaller public libraries, to aid in the establishment of new libraries, and to cooperate with the State Library in the collection of statistics and the extension of its loan system through which a popular and useful service has been rendered in almost every part of the state. The Ohio Library Association, by resolution, has urged that provision be made for this important work. With the satisfactory experience of other states as a guide, it is hoped that the General Assembly may consider with favor the wishes of the friends of this educational movement and authorize the employment of a library organizer.

LEGISLATIVE REFERENCE DEPARTMENT.

The legislative reference work, done in a few states, notably New York and Wisconsin, has recently been the subject of much favorable comment. The chief object of this service is to aid members of the General Assembly in their quest for material bearing upon subjects to be considered by that body. To a limited extent this work has long been done in many states. This was one of the original purposes for which State Libraries were established. Systematic effort for its accomplishment along new lines has attracted favorable attention, and those who have investigated the subject heartily endorse the modern plan. While the great departmental library of the state of New York, with its splendid equipment for this work, could be duplicated only by liberal appropriation and years of expert service, a satisfactory legislative reference department, modeled after the one now in successful operation in the state of Wisconsin, may be provided at comparatively small expense. Mr. Charles McCarthy, Legislative Reference Librarian of Wisconsin, in a recent paper sets forth the essentials for this work, as follows:

1. The first essential is a selected library convenient to the legislative halls. This library should consist of well chosen and selected material. A large library is apt to fail because of its too general nature and because it is liable to become cumbersome. This library should be a depository for documents of all descriptions relating to any phase of legislation from all states, the federal government and particularly from foreign countries like England, Australia, France, Germany and Canada. It should be a place where one can get a law upon any subject or a case upon any law very quickly. It is very convenient to have this room near to a good law library. Books are generally behind the times, and newspaper clippings from all over the country and magazine articles, court briefs and letters must supplement this library and compose to a large extent its material.

2. A trained librarian and indexer is absolutely essential. The material is largely scrappy and hard to classify. We need a person with a liberal education, who is original, not stiff, who can meet an emergency of all cases and who is tactful as well.

3. The material is arranged so that it is compact and accessible. Do not be afraid to tear up books, documents, pamphlets, clippings, letters, manuscripts or other material. Minutely index this material. Put it under the subjects. Legislators have no time to read large books. We have no time to hunt up many references in different parts of a library. They should be together as far as possible upon every subject of legislative importance.

4. Complete indexes of all bills which have not become laws in the past should be kept. This saves the drawing of new bills and makes the experience of the past cumulative.

5. Records of vetoes, special messages, political platforms, political literature, and other handy matter should be carefully noted and arranged. Our legislator often wants to get a bill through and we must remember that he often relies as much upon political or unscientific arguments as we do upon scientific work. He should be able to get hold of his political arguments if he wants to, and the political literature from all parties upon all questions should be kept near at hand.

6. Digests of laws on every subject before the legislature should be made and many copies kept. Leading cases on all these laws and opinions of public men and experts upon the working of these laws or upon the defects, technical or otherwise, should be carefully indexed and as far as possible published in pamphlet form, with short bibliographies of the subjects most before the people.

7. The department must be entirely non-political and non-partisan or else it will be worse than useless. If you have the choice between establishing a political department and no department at all take the latter.

8. The head of the department should be trained in economics, political science, and social science in general, and should have also a good knowledge of constitutional law. He should, above all, have tact and knowledge of human nature.

9. There should be a trained draftsman connected with the department — a man who is a good lawyer and something more than a lawyer, a man who has studied legislative forms, who can draw a bill, revise a statute, and amend a bill when called upon to do so. Such a man working right with this department and the critical data which it contains will be absolutely essential.

10. Methods. — (a) Go right to the legislator, make yourself acquainted with him, study him, find anything he wants for him, never mind how trivial, accommodate him in every way. Advertise your department. Let everyone know where it is and what it does. Go to the committees and tell them what you can do for

them. (b) It is absolutely essential that you get information ahead of time or else you will be of no use in the rush.

A department embracing the major portion or all of these essentials would meet a growing need in Ohio.

STATE ARCHIVES.

The manuscript records of the various departments of any state in which such records have been preserved are a most important source of the history of that state. In these days of original research, there is increasing demand for access to such papers. The words of the State Librarian of Indiana, in recommending the creation of a department of archives, are equally applicable to our own state:

> Any student interested in the history of our State is forced to consult these manuscript documents in order to deal truthfully with his subject. In the present condition of these papers it is quite impossible to do so, as they are scattered through various offices and there is no record in existence as to what now remains or where any particular document is to be found if its existence is suspected.
>
> Further, it is not the chief daily business of the several officers in these offices to know or keep track of these old papers, consequently even they are not aware of the contents in detail of their respective offices, and with the present lack of facility to care for these records they can not be made usable by interested and worthy students of our State's history.

Ohio, the first state carved out of the Northwest Territory, the source from which and the avenue through which the tide of migration has moved to the western regions beyond, has a history worth preserving. The original manuscript sources, as far as they exist, should be collected, arranged, indexed and made available, under the direction of a competent person for reference use.

TRAVELING LIBRARIES.

The report of the work done in the Traveling Library Department is most gratifying. The excellent record of previous years has been surpassed, as the following statistics show:

	Libraries Issued.	Vols.
Prior to November 15, 1896	2	50
November 15, 1896, to November 15, 1897	67	1,331
November 15, 1897, to November 15, 1898	379	9,887
November 15, 1898, to November 15, 1899	445	12,812
November 15, 1899, to November 15, 1900	711	19,505
November 15, 1900, to November 15, 1901	762	20,689
November 15, 1901, to November 15, 1902	803	22,031
November 15, 1902, to November 15, 1903	923	27,078
November 15, 1903, to November 15, 1904	966	30,935
November 15, 1904, to November 15, 1905	1,027	36,441

The libraries issued within the past year were distributed as follows:

To women's clubs	159
To independent study clubs	168
To men's clubs	19
To schools	437
To granges	129
To religious organizations	82
To libraries	33
Total	1,027

These libraries have gone to 806 communities, 159 more than last year. The increase of 51 libraries issued to granges indicates a growing appreciation of this service among the farmers of the State.

STATE LIBRARY BUILDING.

Attention is again called to the crowded condition of the Library. The old Flag and Relic Rooms, assigned to the State Library, have been occupied by the Traveling Library Department. Two additional rooms have been built and filled with books. Practically all available space is now occupied and additions of books will soon be crowded to the floor. The present quarters are very inconvenient. They occupy upper floors in the Capitol Building and are not provided with elevators for the use of patrons.

The need of a new building ought to appeal strongly to the friends of education in these times of general library development. An appeal to Mr. Carnegie would not avail, as he does not give money for the erection of state library buildings. Besides, a great state should not become dependent upon private philanthropy for needed public buildings. Cities within and without our state are providing ample room for their libraries. There is no good reason why Ohio should not do as much for its library. It is hoped that the Legislature will recognize this need and inaugurate a movement for the erection of a new building. Opinion is divided as to the proper location for such building. With a legislative reference department in the State House, it might, with certain advantages, be located at some point in the city beyond the State House grounds.

A survey of the work of the State Library, under the act of 1896, indicates steady progress along many lines of activity with prospects for continued growth and wider usefulness.

Respectfully submitted,

C. B. GALBREATH,
State Librarian.

Zwemer, S. M.
Arabia; the cradle of Islam. c. 1900.

APPENDIX.

MONTHLY BULLETIN

OF THE

OHIO STATE LIBRARY

VOL. 2, NO. 1.

OHIO LIBRARIES.

The following statistics represent the condition of the libraries of the state substantially as reported at the close of the year 1905. Where no report was received from the library, the statistics for 1903 are given, and attention is directed to that fact by the use of the asterisk and a marginal reference.

The source of support is designated in column five as follows: C, corporation; D, donations; S, subscription; T, taxation.

City or Town.	Population 1900.	Name of Library.	Name of Librarian.	Supported by	Vols.
Ada	2,576	Ohio Northern University	Marilla Banes	D	6,200

SCHOOL LIBRARIES.

The statistics of the school libraries of the state, with a very few exceptions, were furnished through the courtesy of Hon. E. A. Jones, State Commissioner of Common Schools. They are compiled from reports on file in his office. These libraries are under the management of the superintendents of schools, a list of whose names may be had on application to the State Commissioner of Common Schools.

In fixing the grade of a high school, the condition of the school library is considered. This has done much to stimulate activity among the smaller libraries of the state. It is believed that the common schools present an especially inviting field to the friends of library extension. Any policy that will measurably increase the efficiency of these will substantially strengthen an important educational agency of the state.
